SwiftAnt®
Co-Creating Digital Excellence

B2B / EDI Integration as a Service (OPEX, High Availability, High Volumes)

Unlock the business value with on-demand Enterprise integrations to leverage data & make effective business decisions instantly.

What is SwiftInt + Microsoft Logic Apps?

SwiftInt + Microsoft Logic Apps deliver the true digitalization of Enterprise integrations, beyond the traditional EDI / EAI implementations. Pre-built and configurable components for Bot driven customer service & business scenarios exception handling, significantly benefit the businesses at a fraction of the cost.

Why customers use SwiftInt + Microsoft Logic Apps?

- Digitalization with extended enterprise, faster, predictable and at fraction of the cost.

- Leveraging data to make effective informed business decisions.

- Enhanced customer service & automation.

Freedom from CAPEX and AMC costs

- Zero CAPEX (Freedom from HW, SW, OS, DB and On-Premise resources for operations monitoring)
- No AMCs and simply pay for what you use
- Instant deployment

ROI within 9-12 months

99.9% SLA with High Volumes processing

- Capability to process very high volumes at low cost
- High SLAs powered by Serverless architecture of Logic Apps
- Compliant with enterprise security standards.

**Infinite scalability and 99.9% availability**

Automation & Customer Service on-demand

- Serverless Architecture of Microsoft Logic Apps.
- Integrated Bot Framework.
- Extremely low OPEX ($0.00001 / action).

Compliance to security & exceed customer satisfaction.

SwiftAnt replaced our on-premise CAPEX centric, EDI setup with Microsoft LogicApps which is totally OPEX based. Our service levels significantly improved & we are benefited by significant value add with high SLAs, low costs & bot driven customer service.

- Business Process Manager, Global Headquarters for Global 3PL company

Features	IBM Sterling B2B / GXS	BizTalk On-Premise	MS Logic Apps out of the box	MS Logic Apps with SwiftINT
