Contact Us

Our mission is to become the global leader in student success software. We aim to deliver the best possible outcome for students, to protect and enhance reputation and revenue sources, and to drive excellence in resource utilisation, process optimisation and regulatory compliance.

SEAtS emerged as a spin-off from our sister company, Softworks, who were asked if they had an attendance monitoring tool. A small team designed and developed an effective attendance monitoring system and SEAtS was born.

According to UCISA, we are the number 1 attendance monitoring system in the UK.

Background

Drive excellence in resource utilisation, process optimisation and regulatory compliance.

Products

Early Warning System

- ✓ Record attendance in 3 ways
- ✓ Flag at-risk students
- ✓ Automatically assign advisors
- ✓ Generate reports
- ✓ Automate communications

Case Management

- ✓ Everything in one place
- ✓ Review all interactions
- ✓ Tiered secure access
- ✓ Review case workload
- ✓ Book appointments
- ✓ Review student history
- ✓ Review all activities
- ✓ Automate interventions

Predictive Analytics

- ✓ Student engagement score
- ✓ Identify at-risk students
- ✓ AI Data Visualisation
- ✓ Statistical Modelling
- ✓ Predict student success
- ✓ Discover trends

Lifecycle

The lifecycle of your campus data....

18%

INCREASE IN STUDENT RETENTION
AFTER FIRST SEMESTER

22%

INCREASE IN SCHEDULED ATTENDANCE
YEAR ON YEAR

Student attendance is easy with SEAtS software.
Choose how you want to record attendance,
and receive data insights into student progress.

Student Attendance

Examining Student Success begins with student attendance.

Increase productivity
and campus visibility
with Smart Attendance
Monitoring.

With SEAtS, a student advisor can be notified immediately if a student is not meeting minimum requirements based on attendance, submissions or grades.

Whats more, student advisors can manage the student directly from our platform for efficient student management.

Remove data silos

What's more, SEAtS lets you pull data from any number of campus systems to deliver a powerful engagement tool that quickly identifies at-risk students for better outcomes.

Early Warning System

With thousands of students to juggle, identifying which students need help the most and delivering much needed services can be a challenge.

3 ways to capture physical attendance

30 day setup....

Student Card

- ✓ Student ID cards capture attendance as students enter a room
- ✓ Suitable for any room size
- ✓ Compatible with existing card readers

Desktop/Tablet

- ✓ Lecturers manually record attendance using a desktop or tablet anywhere
- ✓ Suitable for ad-hoc /off-campus classes

Mobile App

- ✓ Let students record their own attendance when they are within range of a class iBeacon, or lecturer's phone

Predictive Analytics

SEAtS Predictive Analytics is an additional layer of data insight. Pool attendance data and campus data (online attendance, library attendance, grades, submissions, socio-demographic background and previous years data) to create a studentsuccess score for each student.

Our algorithm has been heavily tested so as to accurately predict future outcomes for each student.

By simplifying the available data, management can plan for the future for effective risk assessment campus-wide.

A single student success score based on current and historical data for the entire campus.

Case Management

Why waste time searching for colleagues to give progress reports on a particular student? Open a case on SEAtS and view all interactions immediately for increased productivity, with tiered data access for secure reporting. SEAtS Case Management records all student interactions and places them into one, easy to access place so everyone is on the same page.

Benefits

Find out the last time a student met an advisor, and book an appointment directly from the student profile. Automatically send emails depending on the progress of a student for streamlined case management. Consistency is key to successful student progress. Listing each student interaction with faculty provides transparency, and removes uncertainty in how each case is being handled.

376:1

Average advisor caseload in 2018

Compliance

SEAtS comprehensive compliance solution provides capture and report evidence of substantive engagement for internal and external obligations.

Maximise space utilisation, deliver on funding obligations and provide professional accreditation reporting from one platform.

Automate visa & immigration compliance through workflows that alert to compliance flashpoints and trigger emails, letters and calls to action.

In 2012, London Metropolitan University had its Tier 4 sponsor licence revoked due to “serious systematic failure” including lack of up to date attendance

Customers

We are trusted by our many customers in
Universities & Colleges Worldwide!
