

## Overview

### Automate your sales order and purchase order entry

Create, Manage and approve orders directly from the mobile app without having to login into your ERP system. This app integrates with your existing Dynamics 365 Business Central and Dynamics 365 Finance & Operations.

## Features

Let's face it – many organizations will be more reluctant towards paying more just to manage their sales and purchase order. It is simpler for them to have an automated solution at their fingertips. Order processing is a simple mobile solution helping organizations streamline the process that is easy to manage and maintain 24\*7. With integration to ERP, manual order entry is eliminated.

### Benefits:

1. Role based user access and permissions
2. Enhanced workflows and approvals
3. Automated notifications and email alerts related to order
4. Generates invoice reports that can be shared electronically
5. Low-code solution that works across different mobile platforms, scalable and easy to install.
