Auto Assign & One Click Dispatch

Real time Tracking for Sea Freight and On ground Riders

Notification

Payment Collection and Reconciliation

Dashboards and Analytics

Native Android & iOS White Label Apps

First & Lastmile Optimizations

miFleet:
Native Mobile Driver App optimizing Drivers, Riders & Field Resources enabling Live Tracking & Communications

miDash:
Real Time Dashboards managing Auto Assign, Live Tracking, Manual Dispatch, Load Analyses & Planning Operations

miStock:
Connected Stock, Loading, Pick & Pack, Returns, Damage & FOC Management

miRoutes:
Route Optimization, Load Analyses, Load Planning, Live Tracking, Geo Fences & Heat Maps

miAPI:
Restful API's enabling integration across multiple systems, platforms and aggregators

miOrders:
Enabling Quick & Detailed Order Origination covering diverse businesses requirements. Import Bulk Orders & connect through APIs.

Complete fleet visibility, along with task statuses, Items collection or drop offs and change of schedule at every leg of the process. Easy customer onboarding and orders scheduling.

Unified system to track shipments and delivery orders. Schedule tasks, assign to drivers as per geo location, perform load analysis as per the orders, schedule and vehicle type.

Stock management and inventory control starting from Pick & Pack, Returns, Damaged products and FOC. Nothings missing and entire eco system is updated at the same time, without any data duplication

Easily created geo fences, auto dispatch capability, reassigning tasks to the drivers, heat maps and live fleet tracking to let the logistics and delivery process run smoothly.

Delivery Management stays agnostic to OMS & WMS, easily connected to ERP & Accounting systems, no data duplication, no hassle of repeated Data Entry

Originate Orders through Mile or Import Orders from Any External systems. Consumers & Drivers can schedules & update orders in real time and manage operational workflows

Customer Engagement

miConsumer:
Native White Label Android & iOS Consumer Apps enabling Order Origination, Scheduling, Tracking & Communications

miNotify:
InApp & WhatsApp Notifications for Real Time Customer Engagement & Service Improvements
