

StoryPoint

Managing the workload of your resources and create revenue predictability, work smart not more!

What can StoryPoint do for you?

- A solution that is completely integrated to Dynamics 365 Business Central
- Stay in control of your time tracking
- Follow projects from time reports to your accounting
- Stop chasing hours and see which resources that have time available

StoryPoint consists of functionality to support a knowledge based service company in the core processes such as:

Resource and project planning

In the resource planning matrix you can budget the upcoming assignments of your resources, all in one place. When someone starts working and report time the remaining time is adjusted.

Time tracking

By time tracking within the same system as you are planning, billing and accounting for your projects you get the best traceability possible.

Fill your timesheet on the fly

StoryPoint is now available in the Business Central mobile app and it makes time tracking easier than ever.
