**Corsat**

Educational and training institutions are required to double their efforts, to provide quality services, due to lack of appropriate tools.

## Challenges

Stakeholders face issues accessing and managing educational and training projects. Applicants selection and filtration process is time and effort consuming. Educational organizations seek to implement e-learning.

- Administrators face difficulties managing educational and training projects through diverse platforms.
- Training institutions waste valuable resources on applicants selection and filtration.
- Educational organization lack the proper tools for implementing e-learning.

## Ideal Solution

Managers look for a single platform that will ease the process of managing educational and training projects, filtering of applicants and ability to easily implement e-learning and online testing.

- Education and training management system over a single platform.
- An automated tool that covers the applicants selection process.
- A web-based solution that facilitates e-learning and online testing.

## Desired Outcomes

Corsat offers all education and training tools in a single package. Stakeholders can easily access and manage projects. Training institutions will have hands-on on fully automated filtration and selection of applicants and online testing.

- Stakeholders will have full access to educational and training programs on a unified platform.
- Clients will be filtered and processed based on preset criteria filtration, testing filtration and interviews filtration.
- Auto generation of tests thru test banks for different subjects.

**Equip your educational or training institution with a platform that facilitates project management, applicants filtration and selection and online testing.**

## Corsat Education Management System (CEMS)

- Manages education and training projects operated in different locations through a web-based interface.
- Equipped with a flexible user management system
- Economizing company expenses

## Corsat Applicants Selection Process (CASS)

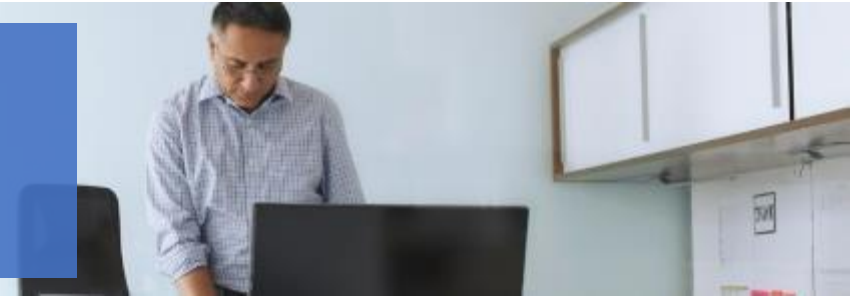

- Easy registration of applicants.
- Scheduling of tests and interviews.
- Check completeness of required documents.
- Placement and distribution of applicants.
- Personalized announcements for applicants.

## Corsat Quiz Facility

- Includes question banks for different subjects, each divided into different sections
- Generates an exam summary page before submission
- Allows follow up on exams during sessions

**IT-Blocks** "The solution improves the training system and saves a lot of time and effort spent on applicants filtration and selection."
