

**Respond to modern customer and
supplier needs and streamline your
production processes**

**The supply chain is changing and participants need the flexibility to manage their
business accordingly.**

What is the Supply Chain Management solution by Prodware?

Supply Chain Management is an end-to-end vertical solution built around **Microsoft Dynamics 365 Business Central**, and helps manufacturers and distributors across key areas of their business.

Why choose the Supply Chain Management solution?

Additional functionality has been integrated with **Dynamics 365 Business Central** in areas such as:

- **Finance:** including additional budget control measures to manage spend and connect teams, import and export functions for bank, management and payroll, streamlined invoicing
- **Procurement:** including additional flexibility in supplier agreements, tender management, charges and taxes, shipping management, purchase restrictions
- **Item management:** including categorization of products, additional features and comments against item descriptions
- **Sales:** including margin controls, pricing levels, trading structures, simplified after-sales service processes, commission management
- **Production:** including streamlined BOM management, batch composition, simplified production order management
- **Quality management:** including quality controls in warehouse (returns and goods-in) and in production, non-conformities, complaints management and analysis
- **Stock:** including alternative unit of measure, sales order adjustments, document management and search functionalities
