

Medicaid Managed Care Organizations: Proactive Outreach

Medicaid Managed Care Organizations (MCOs) have witnessed tremendous growth. Over 72 million Americans are covered by Medicaid with three-quarters of those in Managed Care. Rapid growth has driven a set of challenges for MCOs.

- 1. Revenue loss:** Members do not complete their annual eligibility recertification in time, leading to loss of capitation for those members. States have started linking Pay for Performance (P4P) measures to withhold capitation or bonus payments resulting in lost revenue.
- 2. High administrative burden:** Medicaid members are a transient population, changing their residence often. Invalid addresses on file results in return mail and more importantly, members not getting critical communication on time. Outbound calls are ineffective as Americans are not picking up calls from unknown numbers according to various studies.
- 3. Ineffective outreach:** Reaching members for administrative processes like recertification or quality measures like wellness visits is a challenge too.

HealConnect is a first in class engagement platform that allows Medicaid MCOs to engage members and make them self-sufficient. The platform is configurable to support a range of administrative and care activities. It supports bi-directional communication through digital channels – mobile app, SMS, and messaging.

HealConnect addresses the challenges by:

- **Administrative tasks:** Assist with eligibility redetermination, assessments, deliver electronic rewards and referrals to community partners/resources.
- **Schedule:** Help in scheduling provider appointments, lab visits, annual check-up, NEMT, and health events.
- **Awareness of benefits (Push):** Information about core benefits, preventive services, and eligible services based on life events.
- **Availability of resources (Pull):** Ability to pull provider lists (providers near members), community resources (food banks, farmers markets, health fairs) and chat for “simple questions”.

HealConnect is an extensible platform that supports a variety of Medicaid administrative processes like NEMT or rewards. The current set of partners include:

Service	Partner
Rewards	Walmart – physical/electronic gift card Incentive Solutions – electronic gift card SoHookd – healthy products and experiences
NEMT	Uber Health Lyft
Content	Mayo Healthwise
Communication	Twilio – bi-directional SMS, inbound/outbound calls Sendgrid – email
Medical Devices	Digital scale Digital glucometer Digital blood pressure cuff
Payment	Stripe

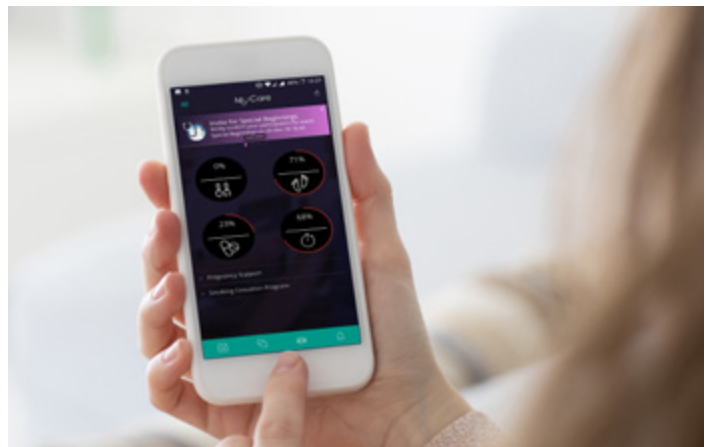

HealConnect also supports a range of use cases across multiple channels:

Use Cases	Chat Through SMS/Portal	Bi-Directional SMS	Field Worker App	Outbound Calls	Email
Eligibility Redetermination		✓	✓	✓	✓
