# All your Workspaces in one Spot

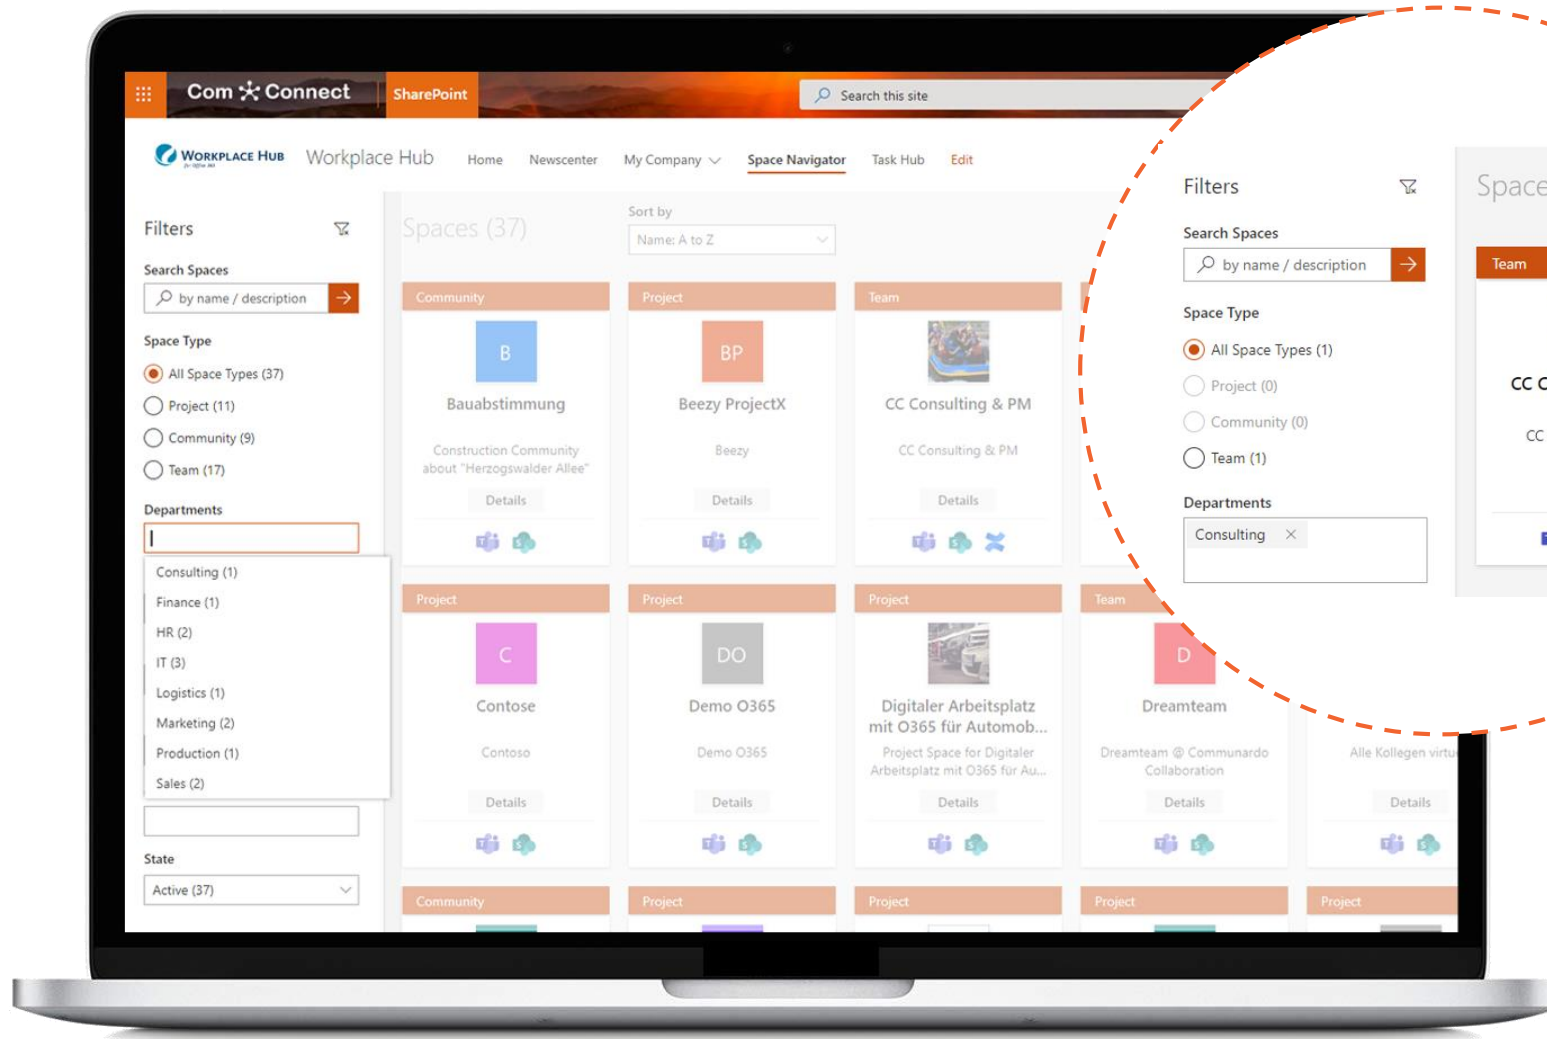

Jumping into work was never that easy

Space Navigator was developed to **organize all your digital workspaces** that exist in your company in one spot. Regardless, if your work is saved in Microsoft SharePoint, Microsoft Teams, Atlassian Confluence or Jira, jumping into work was never that easy.

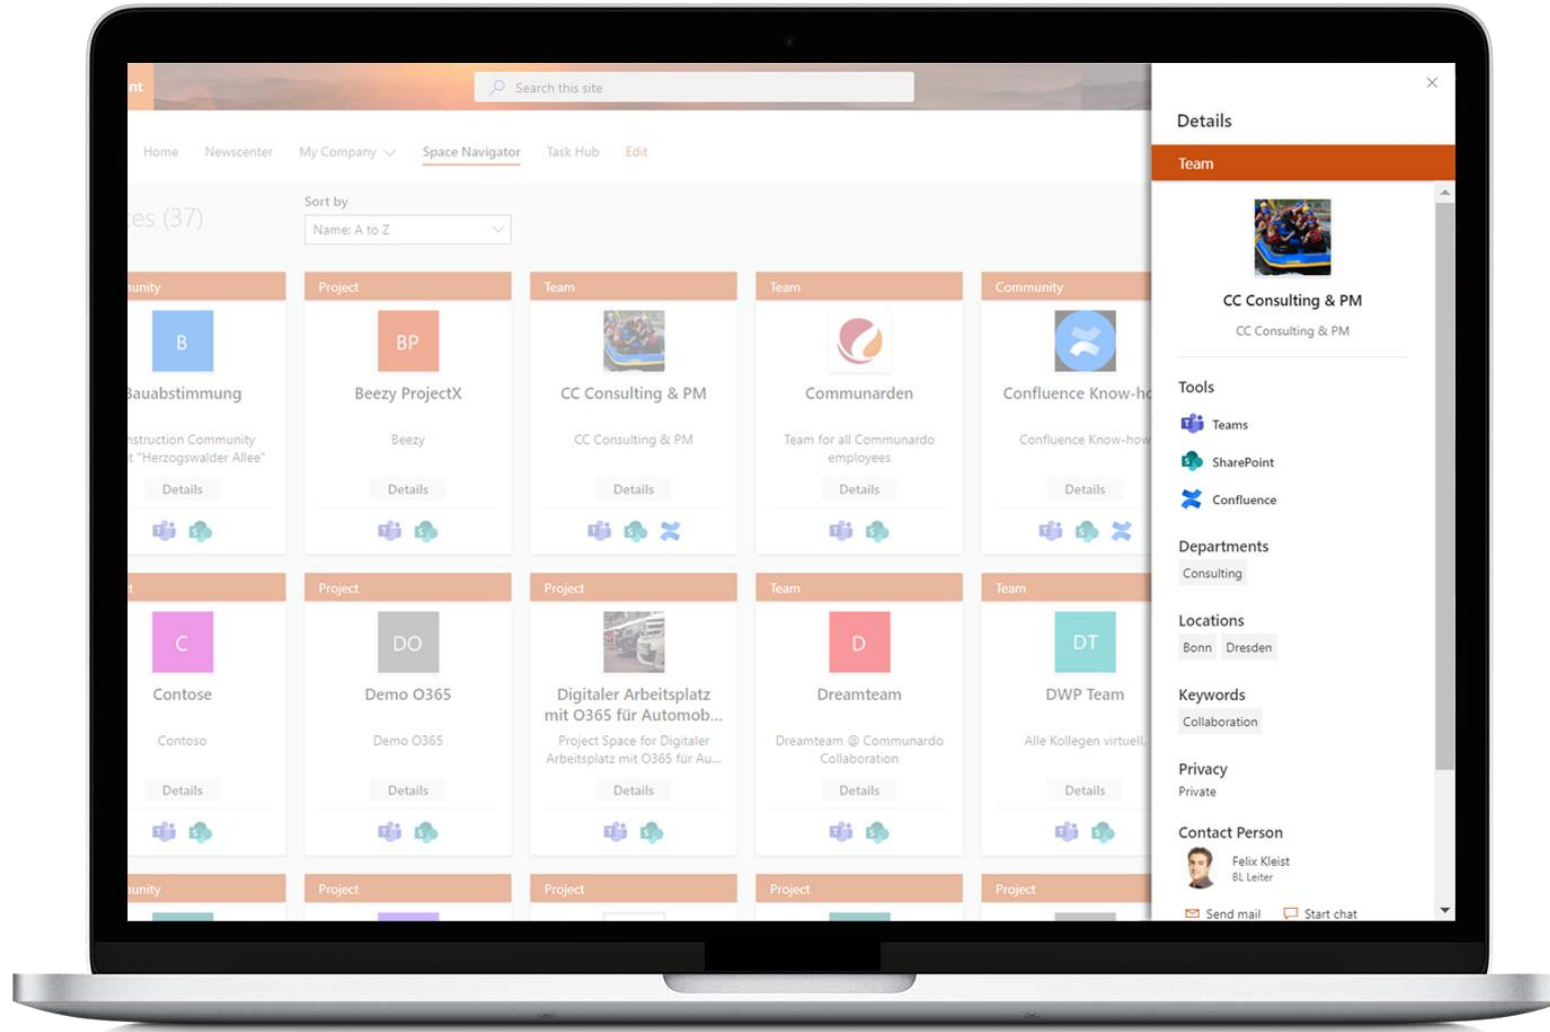

# Organize your Spaces by Metadata

Find the spaces you are looking for in a split of a second

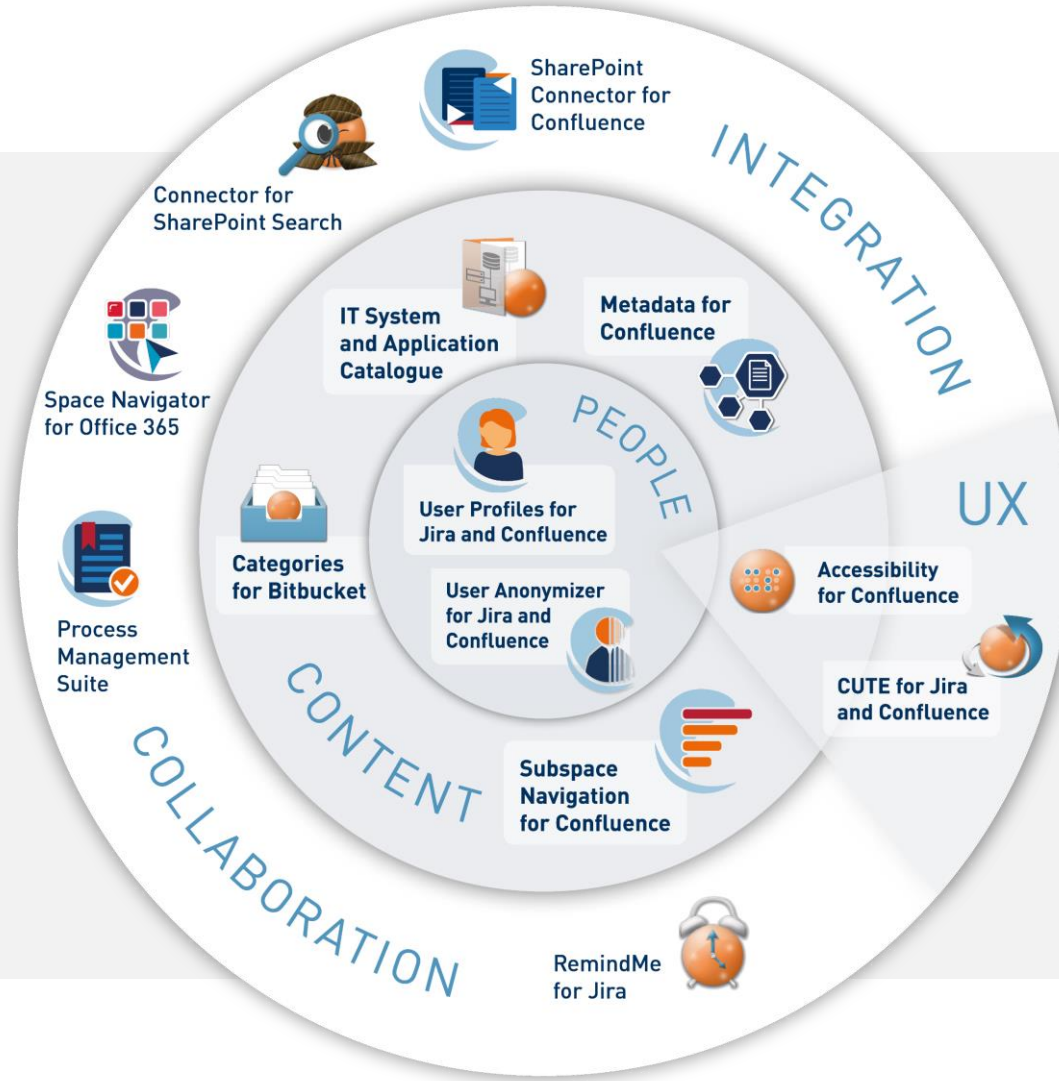

Filtering by relevant metadata, such as location, department, keyword or contact person, gives you the chance to find the spaces you are looking for in a split of a second.

# Details provide Metadata about Spaces

## Embedded in your SharePoint Intranet

Space Navigator offers you **one single touchpoint** for all of your workspaces. Starting from your SharePoint Online Intranet or Digital Workplace, quicklinks bring you right into your work, with one single click of a button.

Communardo builds products for **smarter enterprise collaboration** – we strive to make collaboration effective, fast and fun.

So far more than **5,000 clients** in **85 countries** rely on our experience for their daily business.
