

**ROUTE TRAFFIC** FROM  
YOUR CLOUD APPLICATION  
VIA A **STATIC IP** ALLOWING YOU  
TO GO THROUGH **FIREWALLS** AND  
ACCESS **IP WHITELISTED** SERVICES!

WE HAVE **PROXIES** IN **6** REGIONS

ALL PROXIES ARE **BACKED** BY **2 SERVERS** BEHIND  
**ROUND ROBIN** LOAD BALANCER

WE HAVE SEVERAL  
**DOZENS** SERVERS

WE PROVIDE **ON DEMAND**  
DEDICATED **IP** ADDRESSES  
AND **PROXIES**

ASSURED **RELIABILITY**

## HOW DOES **IT WORK ?**

**1**

You Get Access To **2 Proxy Servers?**

First, we provide you with access to two proxy servers. Each proxy server has a guaranteed static IP address that will NEVER change.

**2**

You Configure Your **Application**

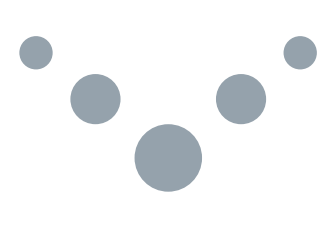

Next, configure your applications to proxy requests using our simple connection string. With most languages this can be done in just a few lines of code.

**3**

Your Requests Become **Static**

Finally, your requests are successfully routed through a static proxy server. So to the end server, it looks like all requests come from your Static IP address.

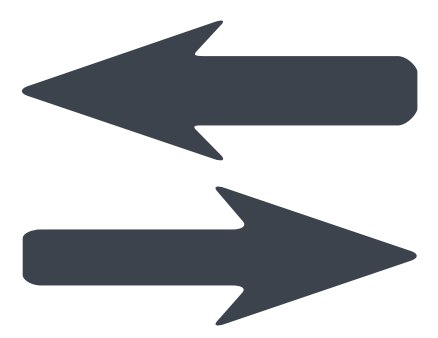

# ALL PLANS INCLUDE

Unlimited E-Mail  
Support

Two Load Balanced  
Static IP Addresses

## FEATURES

### STATIC IP ADDRESS PROXY

Route your HTTP, HTTPS & TCP traffic via a Static IP through an HTTP or SOCKS5 proxy.

### HIGH AVAILABILITY

All plans provide a load balanced pair of IP addresses so if one IP fails traffic will automatically route through the second IP.

### LIVE ANALYTICS

Use your Statica Dashboard to see your requests in realtime and view historical usage.

### LOW LATENCY

Choose a proxy nearest your application for ultra low latency.

### INCREASE YOUR DATABASE SECURITY

Whitelist your Statica IP addresses and use our SOCKS proxy to route all your database traffic via your Static IP addresses. Prevents unauthorized access from unknown IP addresses.

### DEDICATED IP ADDRESS

Dedicated IP addresses are available on request for Enterprise plans and higher.

# Why Choose QuotaGuard ?

Supports 6 Regions

Supports Load Balancing  
and Failover Via Health Check.

Supports HTTP/HTTPS  
Proxies, SOCKS5 Proxies and  
Inbound Reverse Proxy.

**LATENCY**

**DURABILITY**

**SERVICES  
PROVIDED**

**Competitors**

Supports only US.  
Doesn't Support  
Private Spaces.

Simple DNS  
Without Load Balancing,

HTTP/HTTPS Only Proxy.  
Limited Support  
for the SOCKS Proxies.

**James Hall** @MrRio · 8 jun. 2015

Keep forgetting how awesome @QuotaGuard Static is. It just works. If you integrate with anything that restricts by IP, give it a whirl.
