Endpoint automation made easy.

SUREDEPLOY

Endpoint Deployment & Management
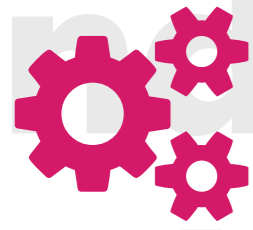

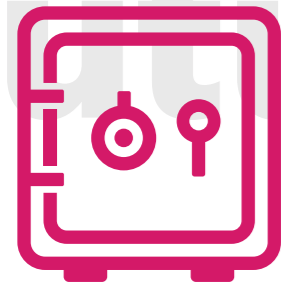

Why SureDeploy?

Easily automate your endpoint deployment & management

**Impressive control.
Impress all who use or see it**

**Future-proof. Bullet-proof.
Built on Microsoft Cloud**

Easily automate your Windows endpoint deployment & management

Easy deployment - Deploy 5 to 50,000 Windows laptops or desktops with ease.

1. → **2.** → **3.**

Hand the device to your user in the box

Login first time everything loads

Every device is configured the same

- **Automated provisioning** - Hand your device to your users in the box. When they login for the first time, everything loads - Branding, Apps, Security, Email, Files and Identity. There is no provisioning requirements from your Service Desk so you save time for users and support staff

- **Asset identity** - Custom tag your device using either barcodes, QR codes or RFID

- **Continuity** - Every device is configured exactly the same. Full policy and group driven configuration ensures no more room for human error.
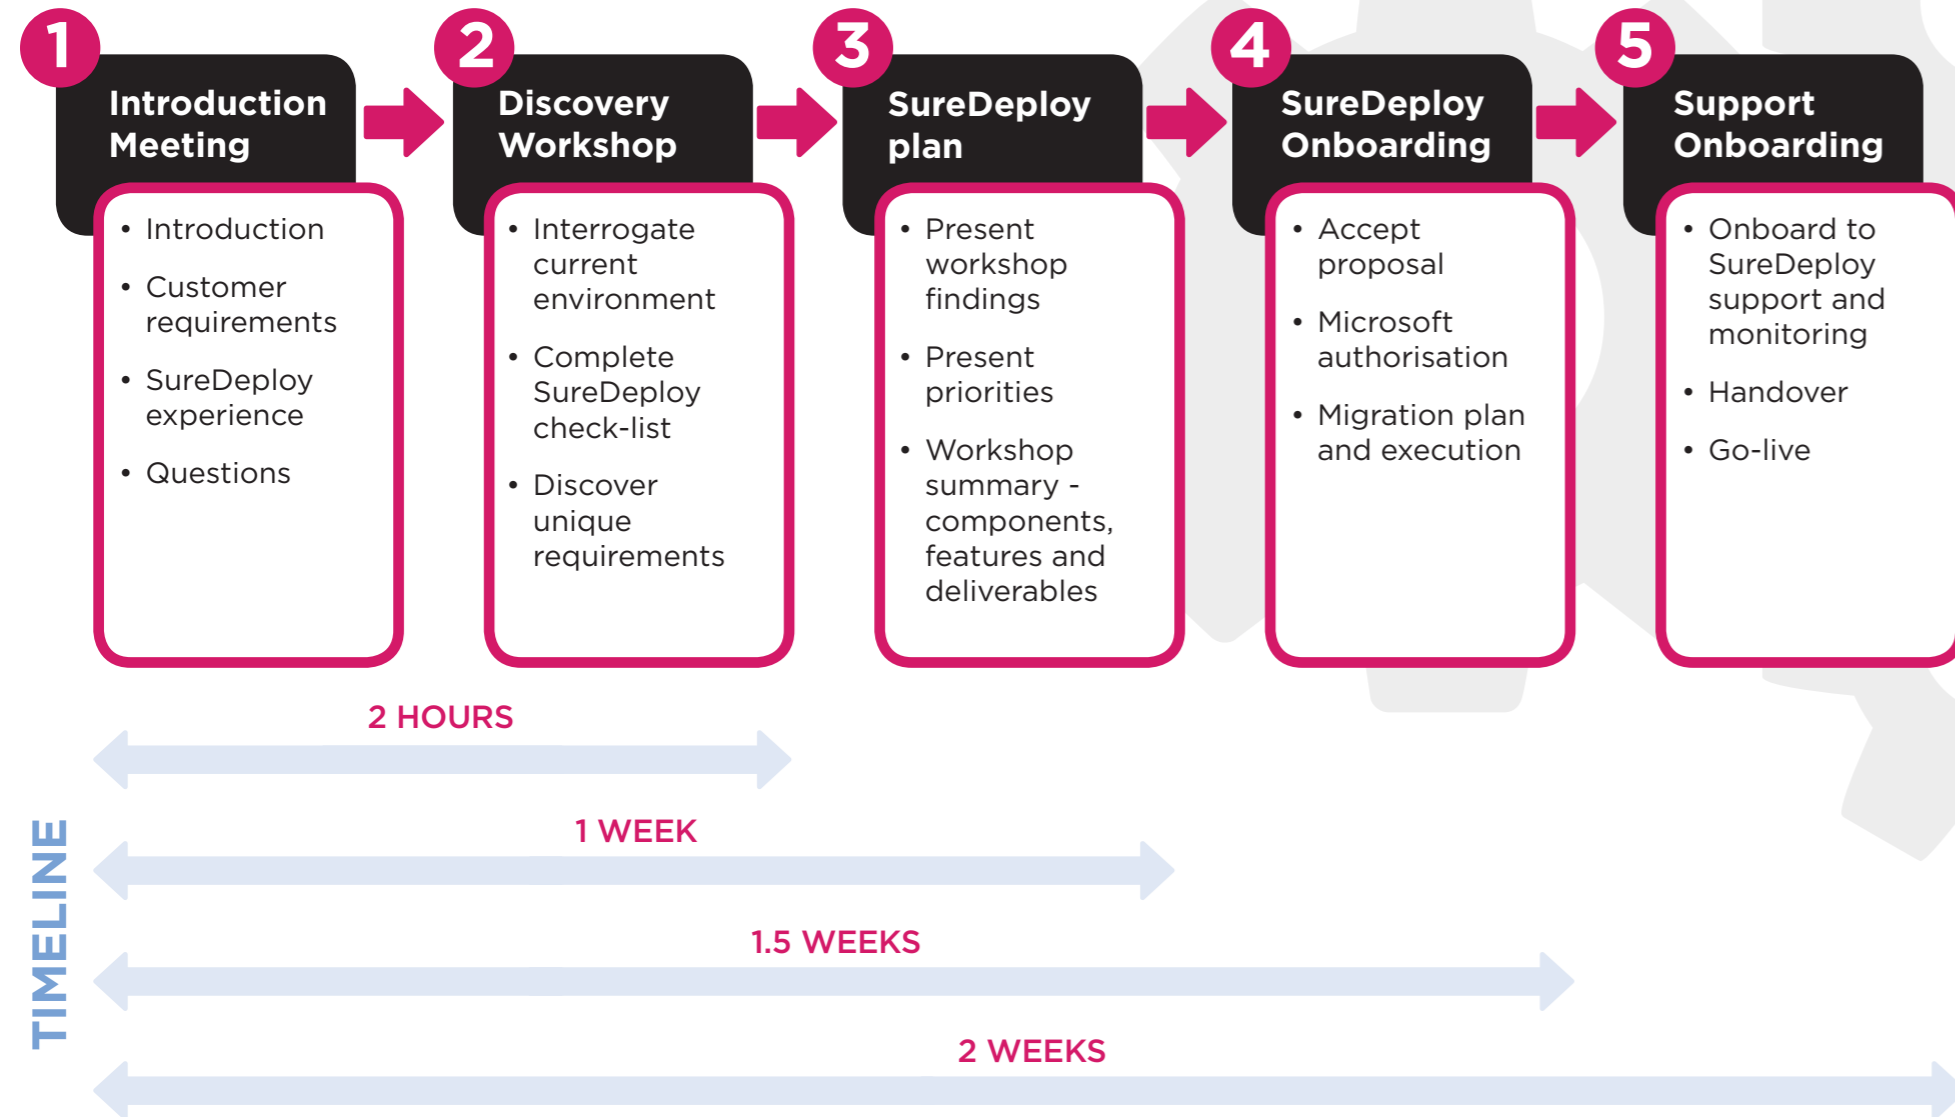

Easy management of your Windows endpoints. Reduce your business reliance on IT helpdesk enabling them to focus on business improvement, rather than 'keep the lights on'.

- **Usability** – Never lose another document - global auto save every 3 minutes to the cloud. Data is safe and instantly recoverable in case of loss or damage of device

- **Application Automation** - Ensure all applications are updated regularly, tested and rolled out without disruption to your users or overhead from your team

- **Hardware issues?** Easily swap, upgrade or replace your device at any time

- **Support** – As all devices are provisioned and maintained identically, support is simple.

Simple implementation and transparent pricing based on your needs

- Scalable for increased devices as and when required

- 5 step process completed within 2 weeks (see next page)

- Priced per application for unlimited installs and updates.

SureDeploy 5-step process

1 Introduction Meeting
- Introduction
- Customer requirements
- SureDeploy experience
- Questions

2 Discovery Workshop
- Interrogate current environment
- Complete SureDeploy check-list
- Discover unique requirements

3 SureDeploy plan
- Present workshop findings
- Present priorities
- Workshop summary - components, features and deliverables

4 SureDeploy Onboarding
- Accept proposal
- Microsoft authorisation
- Migration plan and execution

5 Support Onboarding
- Onboard to SureDeploy support and monitoring
- Handover
- Go-live

SUREDEPLOY
Endpoint Deployment & Management

Impressive control. Impress all who use or see it

SureDeploy provides you with impressive control. You will always be on the front foot when it comes to visibility and reporting.

- **Real-time dashboards** - Real-time vision on the status of your devices and their compliance, all required updates, users and apps. You can quickly present on key metrics of your deployment and ongoing management

- **Brand** - SureDeploy allows every device to reinforce your brand or key messaging including: Asset labels, App Store, Background images and Screensavers

- **Asset managed** - With SureDeploy you know at any time the status of your environment and users, and you will know where your assets are at all time. From the inventory room to products in the field

- **Software managed** - SureDeploy allows you to easily manage your software assets with instant updates on your software licences and any renewal requirements.

SureDeploy impresses all who use it and all who view it.

# Future-proof. Bullet-proof. Built on microsoft cloud

SureDeploy is backed by CNS a global technology company. As a pioneer on the Microsoft cloud, you can be confident knowing as technology changes your product is future-proof and at the forefront of technology ensuring your data is safe and secure

- **284 Security Controls** - based on Microsoft Security Baseline ensures you can be confident your data is safe. Users have access to the tools and apps they need, but they cannot access those you don't want them to

- **Website Lock Box™** - provides authorisation to look at allowed websites only, preventing users from internal and external hacks, preventing unauthorised access or user customisations

- **Policy & Compliance** - If you are in an industry that requires a high level of compliance or' regulations such as ISO 27001, SOC 2 or HIPA we will wrap the relevant controls into visible dashboard and audit report

- **Endpoint Security & Anti-virus** – ensures your device and data is encrypted, apps and Microsoft are updated regularly, your antivirus solution is current across all devices and at the end of life the data is securely and auditable destroyed.

With SureDeploy you will always be ahead of the curve.
