VAT Management for Latvia

The VAT Management for Latvia application for Microsoft Dynamics 365 Finance & Operations platform allows you to manage VAT report lines at document line level, preview, check and adjust VAT appendix lines. With VAT Management for Latvia you can also print reports and save the VAT declaration in xml format before posting.

Features and benefits of using this application:

- Save time by administering VAT in one workspace, where all the necessary forms, reports and settings are collected
- Save money by avoiding reporting errors
- Create and save the required number of report versions, which can also be printed and/ or generate a xml file
