ESGeo
The Sustainability Intelligence Platform

Powered By
ESG principles, became a necessary choice to maximize expected return for Long-term investments. Finland’s Neste, founded as a traditional petroleum-refining company more than 70 years ago, now generates more than two-thirds of its profits from renewable fuels and sustainability-related products.

A “prosocial” way - Mars has developed model farms that not only introduce new technological initiatives to farmers in its supply chains, but also increase farmers’ access to capital so that they are able to obtain a financial stake in those initiatives.

Companies with high governance standards and production processes based on sustainable principles, have a better chance of obtaining profits over time if they comply with ESG’s regulation.
The investor revolution: ESG-oriented investing has experienced a meteoric rise. Global sustainable investment now tops $30 trillion—up 68 percent since 2014 and tenfold since 2004.

Board of directors: According to Annual Corporate Directors Survey, shareholders are paying increasing attention to ESG issues like board diversity, social responsibility, and environmental or sustainability issues. The board plays a critical role in identifying ESG risks and opportunities and helping to tell their ESG story.

Regulations and corporate responsibilities: Companies are subject to an increasing disclosure of non-financial reporting requirements relating to ESG factors by authorities. In Europe today, new regulations require large companies to disclose certain information on the way they operate and manage social and environmental challenges.
### Auditor recommendations in Annual Report

<table>
<thead>
<tr>
<th><strong>ENERGY</strong></th>
<th><strong>DELOITTE, S.L.</strong> – “To facilitate the monitoring and evaluation of the Plan, it would be advisable to continue working on a global scorecard that provides overall control and consolidates the progress updates ...”</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>FOOD</strong></td>
<td><strong>PricewaterhouseCoopers Advisory</strong> – “We point out the following aspect that the company should consider in the next years for a continuous improvement: we suggest to strengthen the reporting and control system, also in view of a future extension of the reporting perimeter to other Group companies, in order to facilitate the availability and verifiability of quantitative data.”</td>
</tr>
<tr>
<td><strong>HOUSE &amp; PERSONAL PRODUCTS</strong></td>
<td><strong>KPMG AG</strong> – “This Responsibility of the legal representatives includes the selection and application of appropriate methods to prepare the Report and the use of assumptions and estimates ... this responsibility includes designing, implementing and maintaining systems and processes relevant for the preparation of the Report in a way that is free of – intended or unintended – material misstatements.”</td>
</tr>
</tbody>
</table>

*“Companies should invest in internal systems for ESG performance information ... improving measurement and reporting”*

ESGeo enables you and your Company to

- Identify corporate key performance indicators of related industry and sector (all GRI Standards are included)
- Collect, measure, and stock sustainability data
- Provide reports and improvements on company’s ESG KPI performance
- Strengthen management’s control over the ESG process and minimize the risk
- Develop programs & initiatives to implement best practices and improve ESG factors
- Audit ESG process and track progress
- Produce easily, with an advance disclosure tool, sustainability reports (included Annual report)

With ESGeo companies get real-time insightful data, covering the end-to-end process of corporate sustainability from data collection to report production.
ESGeo | Sustainability Intelligence Platform

**DATA OWNERSHIP AND AUDIT TRAIL**
- Process owners assign tasks, track completion and report on progress with traceable and auditable data flows

**DATA COLLECTION & KPI CALCULATION**
- Fully leverages Microsoft user friendliness to collect and elaborate data

**EVIDENCING**
- Attach files to provide evidencing or additional information

**USER ACCESS MANAGEMENT**
- Roles and Responsibilities can be predefined by key users

**ADVANCED REPORTING**
- Maximum level of autonomy to release final reporting documents, included Annual Report, fully integrated with Office 365 suite

**TRENDS MONITORING – SET BUDGET AND GOALS**
- Track single KPIs and aggregate goals (E, S and G) driven by materiality matrix

**FLEXIBLE WITH PREBUILT KPI PACKAGES**
- Full flexibility in defining specific KPIs while leveraging prebuilt GRI standards

**MATERIALITY MATRIX**
- KPIs weights and targets allow the definition of the internal materiality matrix with full engagement of company C-levels

**REPORT INTEGRATION**
- Indicators are commented and automatically integrated in a dynamic Report. When indicators change the defined reports refresh
