Abilis Data Rocket

Data Estate Modernization & Customer 360 for Healthcare Institutions

Challenge

Healthcare institutions rely on internal and external data to quickly respond to changes in demand and improve patient outcomes. Quality data is required to measure KPIs across departments and institution-wide, and support mission-critical operations, but without modern data infrastructure, potential insights are stuck in silos and lack institutional context.

Solution

Abilis Data Rocket verifies the value and opportunities in data modernization, with industry-leading technologies, low investment overhead and proven support and proves how quickly data creates value with a modern cloud-based architecture. Within three months, you will be able to answer mission-critical questions such as:

- Am I fully using data to get patient 360 picture?
- Can supplies be ordered more efficiently?
- Can utilization be optimized by analyzing encounter data?
- Can we use data to align measurable objectives at all levels to goals?
- Can we unlock employee potential to make better fact based decisions and get deeper insights?
- Can we gain significant efficiencies through automation?
- Are there claim areas presenting cost savings opportunities?
- Are there preventive care best practices associated with claim cost reductions that can be replicated?

What questions could data help YOU answer? How could you use your data to gain insights and guide your institution?

Who Needs Abilis Data Rocket?

Abilis Data Rocket is designed to meet the needs of healthcare that would like to obtain an Institutional 360 degree view and support a KPI-driven organizational culture.
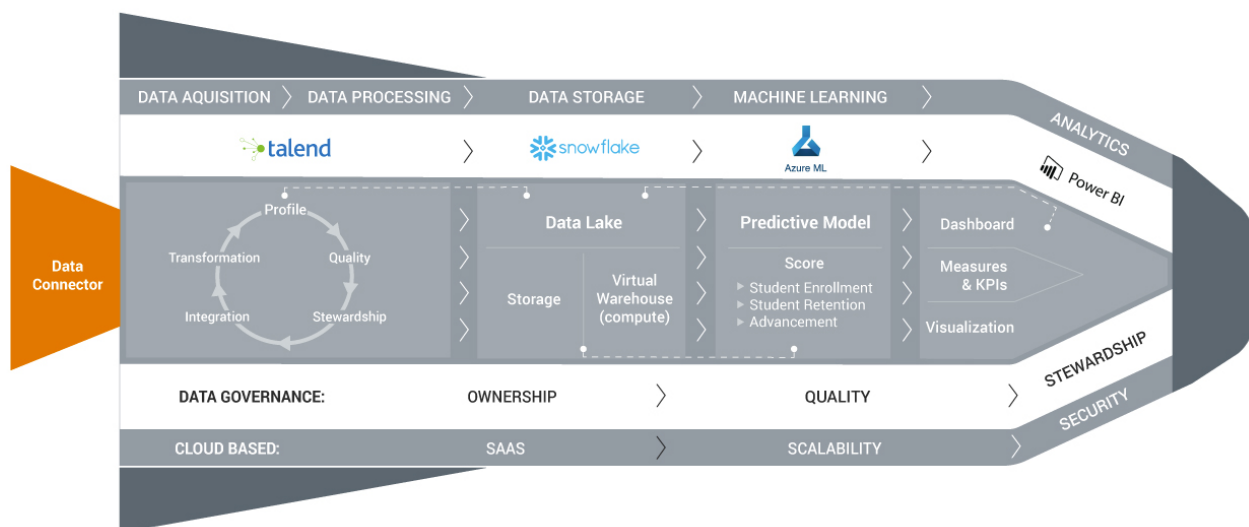

What is Abilis Data Rocket?

With Abilis Data Rocket, you get a working prototype in 3 months using Gartner-leading technologies that will revolutionize the way you use your data.

How Can Abilis Data Rocket Help You?

Abilis Data Rocket empowers data democratization. Specifically, Data Rocket uses Talend on Azure to connect to a source system, land the data in Snowflake on Azure, do light processing on the data, and create a PowerBI dashboard delivering powerful insights using your data.

With uniform, trustworthy data, Abilis Data Rocket provides comprehensive institution-wide insights and the predictive analytics you need to make informed, proactive decisions.

Code-free tools and pay-per-use data architecture allows you to maximize your IT resources and realize the value in your investment.

Abilis Data Rocket

Why Abilis Data Rocket?

Data Rocket was created to prove one simple concept - you can revolutionize the way you use data in 90 days. With Abilis Data Rocket, you are only three months away from strategically using 360-degree Institutional insights. In one season, you can access data in real-time with automated digestions and reporting, and build on your business intelligence with every new insight. And once you've experienced the power of modern data estate capabilities, you can scale your solution to meet your specific needs, with a dedicated team of experienced data architects.

What You Get in 90 Days

Healthcare institutions must navigate a myriad of logistics, from healthcare delivery, to operational supply chain, to physician and employee performance. With so many potential data sources at play, it is critical to be able to use all relevant data to make decisions - such as how to improve patient outcomes, competitively recruit and retain healthcare providers, and identify trends and opportunities in healthcare.

Identify Areas of Opportunity

With quality data ingestion and processing, you will obtain access to standardized data sets, in order to:

- Assess performance, operational and human resource data across your organization;
- Redefine how you measure and assess your KPIs;
- Unlock new insights and create opportunities to cross reference, identify trends, outliers; and
- Form segmented customer lists for targeted communication and marketing.

Maximize Cost/Value Proposition

Most healthcare institutions know they need to upgrade their data architecture, but testing new technology can be overwhelming and expensive. Abilis Data Rocket allows you to experience the technology firsthand, and oftentimes, the cost-savings that come along with a pay-per-use, cloud-based model.

Schedule Your Consultation

Ready to Rocket? One phone call can get you started. Abilis Data Rocket comes with a complimentary technology alignment assessment, pinpointing your strengths and needs. If you decide to continue using your newfound data superpowers after your three-month trial, you will also enjoy a 5% discount on 12-month consumption. Contact bottomano@abiliscorp.com today to get started.

Abilis Data Rocket Partners

Abilis Corp

Abilis Corp is a trusted systems integrator providing end-to-end data and analytics solutions that open up insights business leaders can use.

Talend

Talend is a Gartner-leading data management software company enabling customers to access, process, govern and manage data – delivering trusted data at the speed of business.

Snowflake

Snowflake created an industry leading Cloud Data Platform that delivers the performance, scalability and concurrency required to allow customers to finally address the most demanding data related challenges.

Power BI

Power BI provides interactive visualizations and business intelligence capabilities. Its easy to use interface allows end users to create the reports and dashboards they need to support their data decision-making.
