Unrivaled Flexibility

WebEOCx scales for customers of any size. With proven capabilities across a wide range of agencies and organizations in varied industries, Juvare's built-in customization tools and open API delivers ultimate flexibility to adapt WebEOCx to any need. Seamless integration is also possible with most third-party systems.

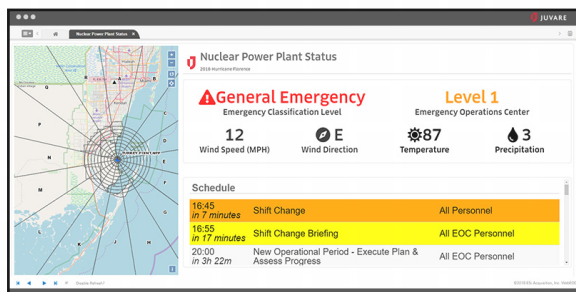

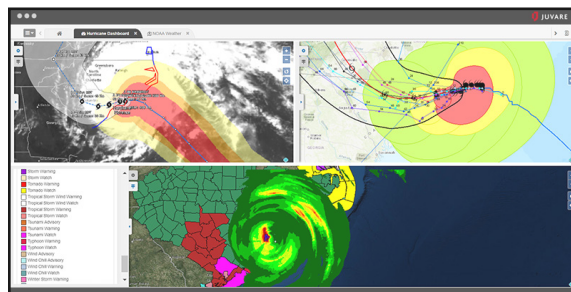

Collaboration Promotes Faster Response

Bi-directional data sharing and common workflows lead to greater collaboration among agencies, resulting in faster response and recovery, and more resilient communities. Every day, WebEOCx users share data across agencies, geographic boundaries, and in both public and private sectors.

Built for Any User, Any Skill Level

An intuitive user interface and workflow make WebEOCx quick and easy to train new users. Non-technical administrative users routinely create forms and processes and customize them to their organization's needs.

Emergency Management Expertise

With users across federal, state and local agencies, as well as healthcare, corporate, non-profit and education, WebEOCx is the world's most widely-used incident management technology, designed from a deep understanding of the needs of emergency managers and incident commanders.

WebEOC Mobile App

Stay on top of critical notifications about incidents, statuses, and resources, as well as capture data and update forms from the field. Forms are mobile-optimized, making them simple to view and edit from any Apple® iOS or Android™ device. Information entered in the app is immediately available in WebEOC to keep users connected to the command or emergency operations center. Offline form entries are captured in the app and data is immediately synced when connectivity is restored.
