

WebEOCx

Estimated Operational Impact

WebEOC Functionality	Benefits	Estimate of Impact
 Information Sharing through a CIMS	All departments, call centers, locations and designated personnel can obtain real time incident related information	Accurate and timely decision making and response to day-to-day and irregular operations
 Maintenance of individual and organizational position log	Tracking of all information related to the position/organization and incident	Organized recording and tracking of information through documentation of activities for use in reporting, analyzing response decisions, and responding to audit inquiries
 Significant Events Boards	Information from individual and organizational logs can be pushed to higher level Significant Event Boards for a boarder audience to view.	Increased situational awareness for more comprehensive event understanding and common operating picture
 Tracking of missions/tasks, logistics situations, and statuses of Critical Infrastructure, Facilities, and Processes	All designated personnel are aware of the status of any situation, entity, resource, or capability that needs tracked. Everyone knows what everyone else is doing and how it impacts them.	A coordinated response can be achieved, deploying only the necessary resources and capabilities, to bring the incident under operational control or back to status quo.
 After-Action Comments Board	Timely tracking of all user recommendations for improvement and comments during an incident	Provides a concentrated source of feedback to generate an improvement plan to refine operational processes and can provide insight to address audit inquiries
 New Status Boards, Forms/Reports, Checklists	Create or modify your own forms and workflows based on new requirements at any time	A more efficient and effective, personalized WebEOC based on change requirements
 Documentation and imagery	Obtain the ability to store, transmit and receive incident documents, images and reference by all agencies	All agencies can obtain incident related documentation and imagery as needed from a sole source
 Audit Trail	Create a permanent comprehensive record of the event or incident	Quickly access and obtain specific incident related data at any time during or after the incident
 Team Management	A comprehensive team management module for team administration, activation, deployment, and tracking	Track all team members' deployment, training and location.
 Open API	An open API provides the platform on which numerous third-party applications can feed or receive data	The ability for true interoperability through the ease of enabling 3rd party integrations
