

Digital Maturity Assessment

velrada

January 2020

**WHAT'S
THE POINT**

Industry: All
Function: IT

Product Overview

Assess your organisation's maturity in its use of digital collaboration tools

The Digital Maturity Assessment is a fast and easy quiz that assesses your organization's level of maturity in its use of digital collaboration tools. Do all departments see eye to eye, or are some teams not making the most of their Microsoft collaboration tools?

Relevant to every organization and all employees, this assessment provides a clear view on how mature your organization is in its use of collaboration tools (like Microsoft Teams). The Digital Maturity Assessment is ideal for IT teams to gather an organization wide understanding of how embedded its digital capability is and where best to focus effort.

Upon completing the survey you will be presented with individualized report results and a link to refer to your colleagues - the more responses gathered, the more informative your results.

- Complete the assessment in less than 5 minutes
- Review your individualized results
- Refer the assessment on to your colleagues
- Gather an organisation wide view on digital maturity
