

ODT Rentals 365 and ODT Service 365 Connector app for Microsoft Dynamics 365 Business Central

Simplify your rental equipment and maintenance tracking process by connecting ODT Rentals 365 and ODT Service 365 for a seamless, integrated solution.

Are you often jumping between the ODT Rentals 365 and ODT Service 365 apps to manage your business? With the new ODT Rentals 365 and ODT Service 365 Connector add-on, you can use these two apps simultaneously and save time.

As a rental business owner, you know how difficult it can be to manage repairs and important ongoing maintenance on your rental equipment. If you can't keep up with return inspections, service tickets, and repairs, you know it could mean damaged assets and lost revenue.

The **ODT Rentals 365 and ODT Service 365 Connector** app is fully integrated and built on top of the Jobs module in Microsoft Dynamics 365 Business Central. It supports the **Essentials and Premium editions of Dynamics 365 Business Central** and enables you to use ODT Rentals 365 and ODT Service 365 together. For example, with the Connector app, you can link a Rental unit to a Service unit in ODT Service 365 (Service alone offers only Items and Fixed Assets as links) and additional service unit statuses that are applicable only to rental units.

ODT Rentals 365 is one complete cloud-based, integrated system for rentals and financials that manages rental units, quotes, short or long term contracts, and recurring invoices with complete real-time visibility into your rental operations. **ODT Service 365** is a simple-to-use business module that extends the power of Dynamics 365 Business Central Jobs. It provides specialized tools to track your internal and external equipment maintenance needs and helps you streamline daily rental business operations.

Features and benefits of the Connector app:

- Create a service ticket for a rental unit from the rental unit card
- Create a service ticket for a rental unit from the rental contract line (where the rental unit is entered)
- Marking a service ticket as "Chargeback" will transfer the billable lines to the rental contract for invoicing
- The link on the rental unit card will display the related service unit, so you can view service history for the rental unit
- The option to create the linked service unit for a rental unit in the "Copy Rental Unit" function

Get the ODT Rentals 365 and Service 365 Connector app for Dynamics 365 Business Central for a more seamless Rentals and Service tracking experience. No more equipment falling through the process cracks!

Functionality you need at a price you can afford

A major challenge for small to mid-sized service organizations is the need for advanced functionality but at an affordable price. Microsoft Dynamics 365 Business Central offers powerful service solutions to small and mid-sized companies with a price point that works for almost anyone.

The release of Dynamics 365 Business Central offers a much improved user interface when compared to its predecessor, Microsoft Dynamics NAV. It has been simplified by Microsoft and offers deployment options for SaaS (Software as a Service), in-house, and hybrid installations while being quicker to learn, easier to use, and less expensive to implement. Business Central offers an outstanding value proposition, especially for SaaS implementations where the system is automatically upgraded by Microsoft on a semi-annual basis.

Choose Microsoft Dynamics 365 Business Central and the ODT Rentals 365 and ODT Service 365 Connector app for a powerful time-saving option for your rental business.
