HubSpot + Dynamics CRM Integration

Cloud-based Integration-as-a-Service From a Leading Hubspot Partner
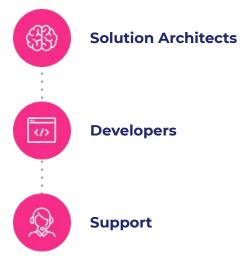

LYNTON

Company Story

Founded in 1999, our passion for technology is the foundation and success of LyntonWeb. In 2009, we realized the expansive capabilities of HubSpot and dove head first into the platform, becoming one of the original HubSpot partner agencies, allowing us to expand our services to clients. Now as a HubSpot Diamond Partner, we'll provide you with the knowledge and tools to align your sales and marketing teams and grow your business through HubSpot integrations. Because we've dedicated ourselves to HubSpot early on, we were the first partner to offer HubSpot CRM integrations, allowing us to refine our processes with every project. Today, our team of solutions architect is HubSpot certified and ready to dedicate their time and expertise to your needs.

Solution Architects

Meet the Integration Team

- LyntonWeb was the first HubSpot agency partner to offer go-to-market HubSpot CRM integrations. Much of our original integration team still works with us today. Since then, we've onboarded more experienced solution architects to expand our CRM integration offerings as well as polish our processes.

- Your integration team of project managers, solution architects, developers, and support will do the heavy lifting while you focus on your integrated inbound marketing strategy. Your team will be focused on certain aspects of your project solely to ensure your integration is truly built for you.

Meet the Integration Team

- Currently, our integration team monitors hundreds of customers syncing billions of records per month

- Because of our overall long standing partnership with HubSpot, our HubSpot-certified integration team is highly experienced with all aspects of integrations from multi-portal configurations, custom CRM integrations, CRM extensions, and other complex requirements

- Our team approaches our cloud-based integration as a managed service with cloud and on-premise connectors - and no software for your team to learn!

Our Technology & Managed Service

# Enterprise Integration Platform

- Cloud-based platform in Microsoft Azure and Amazon AWS

- On-premise agent to connect to in-house systems if required

- No restrictions on bandwidth or connections. We sync billions of records per month.

- Codeless platform - no custom software development

- Dedicated secure environment, 100% SSL

Managed Service
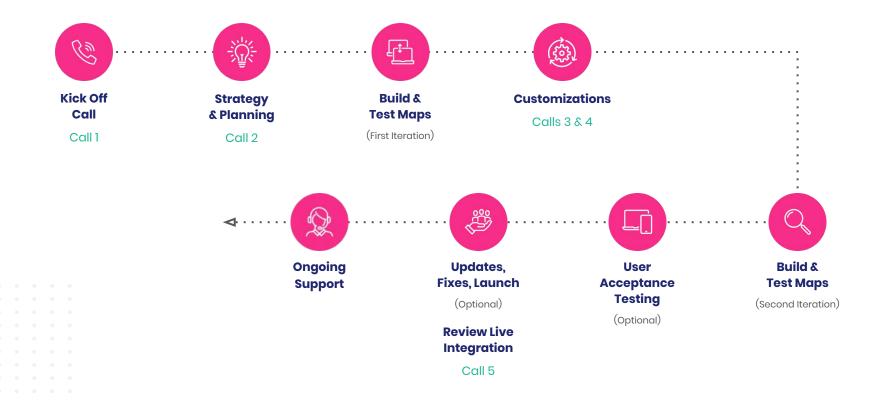

- Proactive maintenance and monitoring of all integrations

- Updates and support for all API connectors including HubSpot and Dynamics CRM used by thousands of customers worldwide

- Dedicated support team to answer questions and make changes to field mappings

- No software to license or maintain

Additional Custom Integration Capabilities

- 3rd party ERP, SQL, CSV, API custom data feeds to and from Hubspot

- Control your integration syncing needs on a field by field level

- Hassle free ongoing maintenance & support for your integration

- Create custom CRM extensions for your CRM Objects

- True System of record

Managed Support

HubSpot Integration

Managed Support

help@integratehubspot.com

support.integratehubspot.com

- We proactively monitor and maintain your integration, fixing any errors before you may realize they're there!

- Our support is delivered through our ticketing system or email during LyntonWeb business hours of 9 a.m. - 6 p.m. U.S. CT Monday through Friday, excluding U.S. holidays.

- Support includes:

  - new or changed field mappings

  - changes to include sync logic and preferences (i.e. changing the filter on a CRM to HubSpot map)

  - changes to connection details - login credentials or URL (including migrating from on-premise to cloud)

  - general troubleshooting

Managed Support (cont.)

- Change Requests and Upgrades Any out-of-scope changes, enhancements, or feature requests will be quoted on a per-incident basis. Examples include:

  - Custom sync logic and automation

  - New sync map for an extra CRM object (i.e. support cases, quotes, projects, etc.)

  - Sync CRM financial records (i.e. opportunities and transactions, if not included in your subscription)

  - Premium support plans are available for purchase, including phone support and extra consulting hours

Driven By Results

Driven By Results

We've successfully launched over 200 Dynamics integrations to date with billions of records syncing daily.

Our integration projects leave our clients feeling satisfied and ready to get to work.

"

Charlie was awesome!
Got our field mappings setup in
no time at all!"

Jared Moore of team D3
