

Additional Items in Microsoft Dynamics 365 Business Central

EN

Avoid mistakes in the creation of sales quotes and purchase orders and increase your turnover by hidden cross-selling potential of your products and services.

When you create sales and purchasing documents, do you want to automatically see any other items or services that are necessary or recommended for the sale or purchase of that item or service?

Highlights & Benefits

The **KUMAVISION "Additional Items" app for Microsoft Dynamics 365 Business Central** allows you to easily assign additional items, spare parts and services in your article master. Various parameters are considered and defined during assignment:

- When documents are created, the additional item or service can be displayed as **mandatory** or **optional**
- Define the **quantity calculation** as a fixed quantity or define an automatic quantity output as a factor for the selection of the "main item" (incl. setting the quantity rounding)
- Automatic generation of **cross-selling references** incl. definition of a minimum number of units
