SOFT4Leasing is an all-in-one leasing software application for asset finance and leasing companies working in auto leasing, equipment leasing and other kind of leasing business.

SOFT4Leasing is ideal for:

- Asset finance companies which require a quick-to-start and highly scalable solution;

- Non-financial institutions where leasing and asset financing is one of the business lines;

- Equipment manufacturers and distributors who offer asset financing to their customers;

- Car dealers with instalment sales and operating leases;

- Real estate developers with rental or instalment sales agreements.

Improve your business with SOFT4Leasing:

- Minimize manual work with interest calculation and automated billing;

- Assure data consistency through the entire leasing process;

- Control human errors;

- Increase performance through daily routine automation;

- Meet compliance requirements;

- Ensure transparency and efficiency in the daily leasing management operations.

- Benefit from increased processing speed, minimising response time to inquiries.

- Save money and time on document filing and lease contract retrieval, increasing administrative productivity.

- Eliminate repetitive data losses and/or misfiled documents.

Trusted Platform
SOFT4Leasing is built on Microsoft Dynamics 365 - grow your business on a single, secure and scalable platform.
