Licensing Requirements

Currently licensed for ConfigMgr: Automatically licensed for Intune for co-managing your Windows PCs.

Currently licensed for Intune: Automatically licensed for ConfigMgr for co-managing your Windows PCs.

Leverage Intune for managing iOS, Android, MacOS devices, or enroll Windows PCs with a different method: Requires standalone Intune license, Enterprise Mobility + Security (EMS), or Microsoft 365.

Licensing of other integrated products: Requires appropriate active licenses to deploy Windows Autopilot, Desktop Analytics, Azure Active Directory Conditional Access, Microsoft Defender ATP, and other features according to their individual licensing terms. Microsoft Endpoint Manager provides an integrated platform to take advantage of these features in a simplified platform.
