At Mazik Global, we're responding innovation-first to the impacts of COVID-19 on healthcare organizations, individual health, and communities.
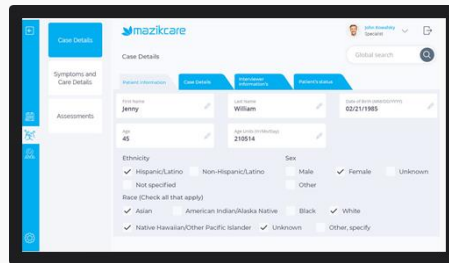

As the international response to the virus grows, we know healthcare organizations are facing challenges they must respond to quickly. We're working together to help prepare and respond with innovations that improve operational efficiency and patient outcomes.

We're taking on today's key healthcare concerns, such as **accurate and *swift reporting*** of COVID-19 patients to public health agencies, ***triaging patients*** to identify the right candidates for testing, and ***reducing the burden*** on caregivers and the healthcare system.

Our team's healthcare IT experts are focused on new innovations that improve COVID-19 patient outcomes and care alignment. Here are several of our developments that are ready for deployment.
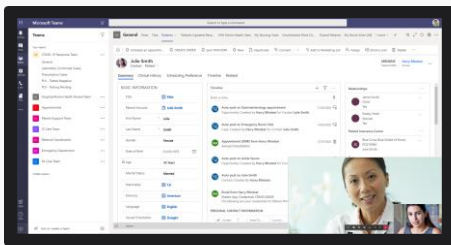

COVID-19 Screening PowerApp

The MazikCare COVID-19 Screening App converts the ***CDC's paper diagnostic case report form*** into an easy-to-use Microsoft ***PowerApp***. It is also integrated with EMR Solutions like Epic & Cerner. In doing our part to help curb the virus's spread, we plan for it to be easily accessible to any healthcare organization that needs it.
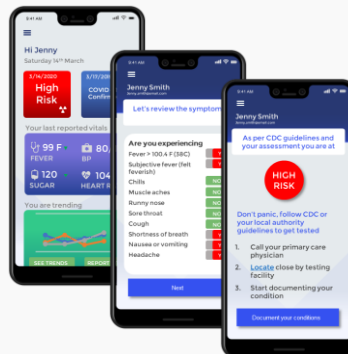

▶ Get Started

COVID-19 Telehealth Platform

Telehealth is increasingly a key way to minimize population exposure and reduce burdens on the system during the outbreak. Our healthcare implementation team is at work deploying Microsoft Teams with ***easy access to patient history*** by including our proprietary EMR integration solution.

COVID-19 Patient App

The public currently ***lacks a self-assessment tool*** to understand which set of symptoms requires greater action. Like the Screening App, our Patient App also follows the CDC's COVID-19 assessment form. Easy to use on any device, it ***gives users peace of mind*** on their health during a time when any sign of illness can feel suspect and stressful. It also collects patient diagnostic data to ***help track an illness's timeline.***

OUR TEAM

For almost two decades, Mazik Global has dedicated its teams to creating and implementing IT and data solutions in the best interests of healthcare businesses to ensure they and their patients thrive. Our leadership team includes longtime CIOs and health informatics leaders, including:

- **Pat Becker, CSO**
- **Suresh Krishnan, CTO**

Each has made their mark transforming healthcare operations at institutions such as *University of Chicago Medicine* and *AMITA Health* in the last 30 years.

IMPLEMENTATION

Mazik Global is following rapid implementation and agile methodology to deploy these solutions to our customers and to help them prepare an effective COVID-19 response.

Deployment Estimates

COVID-19 SCREENING APP	1-5 DAYS
COVID-19 TELEHEALTH	2 WEEKS
COVID-19 PATIENT APP *	IMMEDIATE

* Subject to availability in app stores
