SHIP-TO ADDRESS MANAGEMENT

Manage Ship-To addresses easier and faster

MANAGE MULTIPLE ADDRESSES FOR A BETTER CUSTOMER EXPERIENCE

Customers often use a variety of shipping addresses. This often makes choosing the right address a tedious task for your customers. Especially when there's no simple way to find their desired address. Our App **Ship-To Address Management** is designed so users can easily select and apply their favorite address.

Primary Address

Allow your customers to select their favorite shipping address. With **Ship-To Address Management** you can allow your users to select their favorite shipping address which then will be used as default shipping address.

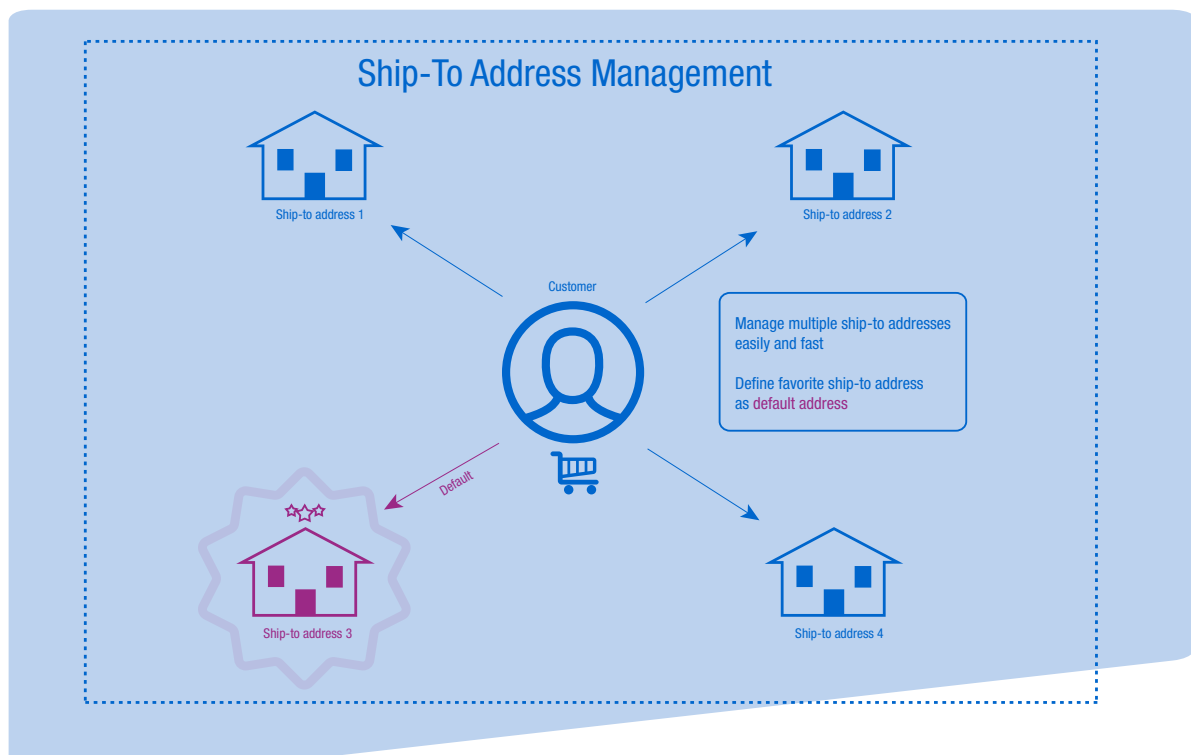

This eliminates unnecessary steps in your sales and services process since the shipping address will automatically be added to new documents.

Alternate Primary Addresses

Ship-To Address Management allows for multiple types of address management. Alternatively you can assign multiple preferred shipping addresses to one customer.

In the sales and service process your user will be prompted via dialog to use one of the preferred shipping addresses. The selected address will be added to the document.

With this add-on the manual selection of shipping addresses will not be changed. It is therefore still possible to change addresses manually.
