

# The identity platform for building secure, scalable, and smart experiences for your employees and customers.

IDPROO is a cloud-based identity and access management solution. It helps companies manage and secure user authentication into modern applications, and for developers to build identity controls into applications.

## WHAT WE OFFER

IdProo is the management of identity and access of employees, partners, and customers who are centralized and integrated. Employees can use one account for all access to all applications so that the utilization of technology can be maximal. The IT team is no longer precipitated with repetitive work related to identity and employee access.

Using Azure Web Application to multi-tier cloud services that scale up as your traffic grows. Securely run your apps in your Azure Virtual Network at large scale with enhanced privacy, power, and performance using an App Service Environment. Automate deployments with continuous integration/continuous deployment (CI/CD) capabilities using DevOps

Consolidate disparate systems and identities into existing infrastructure, facilitate migrations and extend AD to non-Windows systems. With IdProo Integration, the HR department can drive the entire employee lifecycle from onboarding to offboarding, and provide access to the apps and directories users need. Unified authentication using singe sign-on portal and single identity

IdProo leverages Microsoft's Integrated Windows Authentication to authenticate users to IdProo when they are logged in to their corporate network and using Azure Web Application to get high availability within and across Azure regions as you deploy data and host services. Continuous delivery using Azure DevOps to ship updates faster

# WHAT OUR CUSTOMERS ARE SAYING

"IdProo Automating the process of identity and access management of employees, whether onboarding or offboarding. Also, Portal Single Sign-On allows employees to access applications with SingleID. The IT team is now more productive and not disengaged with issues related to identity and employee access

- Yunan Fathoni, GM Application, PT. Waskita Karya Tbk

# **Microsoft Azure**

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.

### **KEY USE CASES**

#### **WEB APPLICATIONS**

Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

#### **CLOUD STORAGE**

Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

#### **BIG DATA & HPC**

Get actionable insights from your data by taking advantage of a fully compatible, enterprise-ready Hadoop service.

#### **MOBILE**

Accelerate your mobile app development by using a backend hosted on Microsoft Azure.

#### **MEDIA**

Create, manage, and distribute media in the cloud everything from encoding to content protection

# **WHY AZURE**

#### **FLEXIBLE APPLICATION MODEL**

Microsoft Azure provides a rich set of application services, including SDKs, caching, messaging, and identity. You can write applications in .NET, PHP, Java, node.js, Python, Ruby, or using open REST protocols. This is all part of Microsoft's promise to let you build using any language, tool, or framework.

# **ALWAYS ON, ALWAYS HERE**

Build resilient applications with automatic operating system and service updating, built-in network load balancing, and geo-redundant storage. Microsoft Azure also proudly delivers a 99.95% monthly SLA. You can rely on decades of experience in data center operations and trust that everything Microsoft Azure offers is backed by industry certifications for security and compliance.

#### **DATA CENTER WITHOUT BOUNDARIES**

Microsoft Azure makes it easy for you to integrate your on-premises IT environment with the public cloud. Migrate your virtual machines to Microsoft Azure without the need to convert them to a different format. Use the robust messaging and networking capabilities in Microsoft Azure to deliver hybrid solutions, and then manage your hybrid applications from a single console with Microsoft System Center.

#### **GLOBAL REACH**

With data centers around the globe, a massive investment in data center innovation, and a worldwide Content Delivery Network, you can build applications that provide the best experience for users, wherever they are.
