

Managed Cloud Services, Purpose-Built For Healthcare

Innovate Fast, Stay HIPAA-Compliant

You need to deliver reliable healthcare solutions fast – you can't afford to slow down. Which is why we bundle six pillars of service in a single HITRUST-certified cloud solution for AWS and Azure. So you can innovate fast, and stay HIPAA-Compliant.

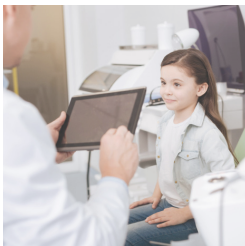

1 Managed Services Infrastructure You Can Depend On

Continuous monitoring and management to ensure high availability and performance. Automated backups, patching, logging and analytics enable you to innovate fast. Includes a 24/7/365 help desk.

Cloudticity was the first AWS partner to obtain a perfect score on the AWS Audited Managed Services Provider assessment.

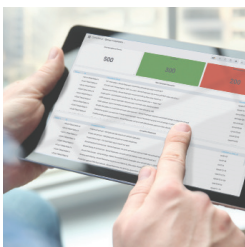

2 Managed Security Automated Safeguards Help You Focus on Innovation

With healthcare records selling for more on the black market than any other type, you need security that is purpose-built for healthcare. Our managed security has you covered. Includes a 24/7/365 SOC team.

A Cloudticity-managed workload has never experienced a breach in 8+ years of business.

3 Managed Compliance Easily Meet And Maintain HIPAA And HITRUST Standards

Never worry about compliance again. Continuously meet HIPAA and HITRUST standards in the cloud. Access real-time compliance dashboards and instantly prove compliance to customers and stakeholders.

97% of issues are automatically resolved without clients ever needing to submit a ticket. This allows clients to move fast and not slow down for updates.

4 Cloud Cost Optimization

Reduce IT Costs, Increase Flexibility

Staying on top of deleting old projects isn't always top of mind. Our cloud cost optimization takes care of this for you. Leveraging machine learning to identify wasted spend, we help you reduce costs without slowing down.

Cloudticity's managed cost optimization saves customers an average of 30% on cloud spend.

5 Managed Kubernetes

Deploy HIPAA-Compliant Clusters On Demand

Creating and configuring clusters can be a tedious process – but not anymore! Just add some basic values into our template and the automated workflow does the heavy lifting for you, leaving you more time to focus on your applications. (Note: only available for AWS currently)

Gartner predicts that by 2023, more than 70% of global organizations will be running more than two containerized applications in production.

6 Unified Logging

Log Management Made Simple

Correlating disparate logs to troubleshoot issues or prove compliance can be a headache. Our unified logging makes it simple. Visualize data on a single pane of glass, gain meaningful insights, and avoid buying expensive third-party tools.

“ Partnering with Cloudticity has freed us to focus on developing our application, getting more customers, and driving revenue.”

– Rob Visser, Business and Compliance Analyst, Caredove
