

Hybrid Identity and Access Management

Hybrid IAM solution combining the scalability and security of Cloud IAM and the integration and customization capabilities of on premise IAM

Cloud IAM solutions provide powerful capabilities, yet integrating on-premises applications with cloud services for automatic provisioning and roles management still faces some challenges and limitations.

Elevate Hybrid IAM is built on Azure and is integrated with Azure Active Directory, a leader in IAM security. The integration delivers a hybrid IAM solution with a complete set of features for identity lifecycle management, access management, identity governance, and identity security.

Why Elevate IAM?

- Highly customizable
- Integrates with third party and home grown applications
- Managed application supported by highly experienced team

Comprehensive features

- Identity lifecycle management
- Role based access control
- Identity governance
- Access Management
- Reporting and Analytics

Hybrid support

- Integrate cloud and on premise identities
- Manage cloud and on premise application accounts
- Enhance on premise IAM with cloud IAM features

Managed Application

- Option for delegated management
- Approval for just in time Access
- Continuous monitoring and configuration update

Complete possibility necessary features to acquire with only module

Combines possibilities of on premise IAM with the power of cloud IAM customization

Reliable and secure management by experienced team

Elevate IAM relies on a combination of Azure AD features and MIM synchronization engine to provide a customized and hybrid IAM experience

Identity Panel (IP)

- Self service features
- Custom interface for managing provisioning and accounts and rights management
- Integrated with Azure AD

Elevate IAM + Azure AD

- Azure Active Directory is leader in IAM and security solutions
- Client access licenses acquired with O365 and Azure AD licenses.
- Large and native connectors already available to speed up integration

Elevate IAM

Our promise to you

With more than 15 years of experience in IAM we promise to bring you a comprehensive IAM solution to answer to your specific needs and integrate with your cloud and on premise systems and applications

An offer to get you started

- The offer is built on robust Azure infrastructure and integrates natively with Azure AD
- Start with a defined set of integrations and extend later on
- Our offer includes optional managed services to delegate the IAM management to our experienced team

Tangible Benefits

- Integrated identity lifecycle management for local and cloud accounts
- Simplified and secure local and cloud application access
- Know who has access to what
- Web view to review and approve access rights
