

The Product Configurator for Dynamics 365 – as individual as your business

ABOUT ESYON

ESYON has been a Microsoft Partner for many years, and since of late also is Cloud Solution Provider. All solutions are integrated into Dynamics 365 and developed with your e-commerce business in mind. The Product Configurator enables your customers to purchase complex products conveniently.

WHAT WE OFFER

The Dynamics 365 product configurator for your online store

Have complex products individually assembled and purchased in the e-commerce platform of your choice, including all relevant data such as prices in real-time.

Directly in Dynamics 365

Integrated into the ERP - no middleware, no loss of performance, no double maintenance of the products in the online shop

Guided configuration

Through dependencies and hints in case of incompatibility, the customer journey becomes faster and error-free.

Flexibility in sales - No restrictions

Individual quotes can be created directly from Dynamics 365 and sent within seconds. With the product configurator, even highly complex products can be mapped.

WHAT OUR CUSTOMERS ARE SAYING

"The Product Configurator enables our B2B retailers to sell fully customized products to our consumers."

- Martin Spinnler, E-Commerce Manager, erfal GmbH & Co. KG

Increase your return on investment with Microsoft's agile and efficient cloud solution.

TALENT

Extend your virtual team and coordinate faster with a consolidated view of team members, activities and responsibilities.

MARKETING

Gain end-to-end visibility by connecting data from external markets, social and legacy sources

WHY MICROSOFT DYNAMICS 365

Modern applications that deliver new experiences and connect with a businesses' existing systems to allow organization to digitally transform their way. Applications that use mixed reality, the ability to take an application that overlays on the reality in front of the user, that guides them through a business process like never before. Connect to information from social networks, mobile devices and micro-applications to drive intelligence and inform a more effective business process.

Unified data and processes that enables business without silos. Centralized data enables disparate groups to work together effectively with a single, trusted view of processes, relationships and data. Data connectors allow thousands of systems to bring their data to a single network.

Intelligence that delivers actionable insight. Data in the new world includes social, relationship and productivity information in addition to insights generated by business systems. The right solution requires a unified approach that allows companies to automatically leverage their data to decide and act in real-time with expanded analytics, predictive algorithms, and automated AI.

An extensible environment that enables change. The right solution establishes a data, communication and application environment that makes it easy to evolve and extend existing business operations, while introducing technologies that enable users to create solutions where no solution exists and to expand data analysis.
