

**SIPPIO makes enabling Voice
into Teams simple with
Microsoft Direct Routing
as a Service.**

**SIPPIO provides flexibility
to migrate at will to Teams.**

Please contact us for the narrative script for this deck; hello@sippio.io

voice collaboration

VOICE is the most fundamental form of relations and collaboration between people

VOICE augments and extends collaboration tools including email, IM, meetings, file shares and wikis

VOICE conveys emotion, intent, importance, conviction, power, direction and thought

VOICE is used for the exchange of ideas, to discuss, gain input, question and clarify to share

VOICE should be simple, easy and integrated with options across all devices

Fact Finding Questions:

- Are you seeking an end-to-end solution 100% in the cloud for Voice and Business Calling?
- Are you using Microsoft Teams today?
- Would you like a non-committed contract with ability to opt-in/out; go up/down monthly?
- Do you have multi-national needs?
- Do you require a secure, compliant, redundant solution to ensure superior availability and non-blocking?
- Are you seeking Integration with a Legacy PBX or SfB?
- Would you benefit from automation to provision and admin users and monitor voice quality?
- Would you like to monitor the entire call end to end?
