Accelerate your Windows Virtual Desktop deployment and management with Rimo3

Automated Modernization Application Delivery and Management for Windows Virtual Desktop Running on Azure

Rimo3 enhances the Windows Virtual Desktop experience by removing the complexity from modern application delivery and management with its Application Modernization Platform named Rimo3 Cloud.

For IT teams, Rimo3 helps discover, modernize, and manage application workloads for the move to Windows Virtual Desktop. Users can automatically scan their application portfolio to **discover** candidates suitable for onboarding into Windows Virtual Desktop or modernizing to MSIX. Users can automate the pre-testing of their applications, the conversion to MSIX, and post-conversion testing while applying automated remediation if the conversion fails. The result is a **modernized**, deployment ready MSIX package. And, with each Windows Virtual Desktop feature release and update, users can fully test applications automatically prior to deployment, providing complete confidence and **ongoing management**.

For Partners, Rimo3 will help extend their managed services capability to improve margins and help them bridge project-based revenue to subscription-based recurring revenue and add value to customers who need to modernize and move to Windows Virtual Desktop and manage regular updates in their Desktop workspaces.

Rimo3 offers an easy to use, scalable, and cloud-based platform, helping businesses and Partners:
- Accelerate Windows Virtual Desktop migration
- Modernize Windows applications to MSIX
- Manage an effective deployment of Windows Virtual Desktop

> "Our customers are increasingly turning to Windows Virtual Desktop as they turn to remote work environments. With solutions like Rimo3's application modernization platform, organizations can easily onboard applications into their environments, proactively understand the impact of changes, and roll out new applications and updates with minimal user interruptions."

Windows Virtual Desktop & Rimo3 Integration

Enterprise Fit For Use

Take full advantage of the native Microsoft technology stack available through Windows Virtual Desktop. Rapidly modernize and manage applications at scale to support Azure migration with Rimo3 Cloud.

Our 'Enterprise Fit For Use' model helps you achieve it all.
- Discover the candidates suitable for moving to Windows Virtual Desktop with the option to modernize to MSIX.
- Use intelligent testing to understand the package pre-conversion, convert the application, test the MSIX package post-conversion – if it fails, apply automated remediations.
- Deploy fully tested quality packages with complete confidence. Prior to deployment, continually test your applications as new versions of CU and Windows are released in your Windows Virtual Desktop experience.

ENTERPRISE FIT FOR USE — DISCOVER · PLAN · DEPLOY · LEARN · OPTIMIZE · MANAGE · MODERNIZE · ONBOARD — Rimo3

Rimo3 Windows Virtual Desktop Journey

Discover
Leverage automation to discover candidates suitable for moving to Windows Virtual Desktop with the option to modernize to MSIX.

Modernize
Leverage automation to test applications, convert to MSIX, and test again post conversion in minutes. If it fails, apply automated remediations

Manage
Leverage automation to deploy fully tested quality MSIX packages with confidence to Windows Virtual Desktop. Manage regular updates with a push of a button.

The Benefits of Using Rimo3 for Windows Virtual Desktop

Application Modernization
Rimo3's MSIX transformation platform undergoes an automated 5-step process move your application portfolio to Windows Virtual Desktop painlessly and quickly. It empowers informed decision making prior to deployment.

Business Productivity
Transform applications with automated conversion and remediation in minutes. Then, understand all three tenants of application testing – compatibility, performance, and functionality – to onboard applications to Windows Virtual Desktop and ensure the right application is being delivered to the correct user with no downtime.

Cost Savings
Maximize the value of the resources that you already have by allowing them to focus on innovation. Leave the mundane to Rimo3's automation platform.

Differentiation & Innovation
Simplify the transformation process and help manage an effective deployment of Windows Virtual Desktop. Partners gain access to one easy to use, scalable platform to discover, modernize, and manage applications with no manual effort.

Time to Value
Leveraging automation allows your organization to run tests 24/7/365 pre-deployment and stay on top of continuous change and updates in Windows Virtual Desktop. There is none of the time constraints or fatigue that are typically associated with manual application conversion or testing.

Superior Service
Partners have the technology to helps customers develop their cloud migration and uncover business growth by overcoming complex modern application hurdles and deployment failures.

Learn more about how Microsoft and Rimo3 together help you be Enterprise Fit For Use.

Rimo3 is evolving and retooling existing services and processes to shift from 'coping with change' to 'embracing change,' we'll help your business rapidly modernize and manage applications in Windows Virtual Desktop.

About Windows Virtual Desktop

Windows Virtual Desktop is a comprehensive desktop and app virtualization service running in the cloud. It's the only virtual desktop infrastructure (VDI) that delivers simplified management, multi-session Windows 10, optimizations for Microsoft 365 Apps for enterprise, and support for Remote Desktop Services (RDS) environments. Deploy and scale your Windows desktops and apps on Azure in minutes, and get built-in security and compliance features.

About Rimo3

Remove the complexity with modern application delivery and management for Windows Virtual Desktop by using the fully automated platform, we call, Rimo3 Application Modernization platform. It's easy to use, scalable, and cloud-based. It provides accurate, data-driven outcomes for improving your application discovery, transformation, and management, and much more.
