

Microsoft Solutions for Community Care

Community Care is undergoing an unprecedented rate and scale of change, forcing providers to re-imagine how they attract customers, deliver cost effective services and achieve an uplift to their organisational capabilities connecting front and back of house. Thriving in this market-based system will require fresh thinking, new technology and alternative ways of working to meet customer needs.

Turn data into improved client outcomes

Manage enquiries

Manage campaigns and enquiries across a range of modern channels including chat, social, email, web, phone and face-to-face

Engage & onboard

Track communications against customers, draft and approve agreements mapped to government programs and capture the services being funded

Roster & schedule

Allocate workers based on preferences and characteristics. Visualise appointments via schedule board and location views. Identify appointments that don't meet rules e.g. travel time. Alert participants once appointments are made

Service delivery

Provide workers with real-time access to schedules, client information, navigation and the ability to record time and mileage. Add alerts and case notes and clinical data anywhere, anytime, on iOS, Windows or Android devices

Validate delivery

After electronically capturing proof of delivery, time and travel, team leaders can review any discrepancies or entries that fail to pass configured business rules

Bill & claim funds

Generate invoices and payment requests and capture costs based on support agreements. Integrate with an existing finance system or implement Microsoft's to manage revenue and understand client profitability

Reconcile payments

Combining job costing and accounts receivable capabilities allows standard cash receipting and accounts receivable processes to be adopted to manage finances that fund service delivery

Analyse & improve

Gain rich insight into client profitability, future service demand and operational performance to make informed strategic decisions

82% of people turn away from a business because of a bad experience
- KPMG

60% of home care operators in 2017 could not adequately answer questions
- KPMG

KPMG has more than 20 years experience implementing Microsoft solutions and is one of the largest Microsoft Dynamics Partners in Australia.
