# MESHSYSTEMS

*An IoT Solutions Innovator*

# Prevent kitchen downtime and streamline operations

Mesh Systems' **Connected Kitchen Equipment** solution for quick-service restaurants (QSRs) and commercial kitchens is an end-to-end connected platform for kitchen equipment. Operational data from ware washers, fryers, protein holding units, brewing equipment, and more are brought together into a single pane of glass for management. Kitchen operators can proactively respond to equipment fault codes and performance data—streamlining operations and reducing equipment and kitchen downtime.
**MESHSYSTEMS**

## Simplifies management of kitchen equipment
Actionable insights from all your kitchen's digitally native equipment are delivered in one pane of glass—vastly simplifying the operations management.

## Reduce downtime, increase sales
By proactively responding equipment faults codes and telemetry, kitchen downtime is decreased maximizing potential revenue.

## Enable inter-equipment communication
By connecting multiple equipment types to one cloud solution, commercial kitchens can implement cognitive solutions to become more predictive.

# Connected equipment differentiates commercial kitchens

BUNN is one of the world's leading OEMs of commercial coffee equipment.  Working with Mesh Systems and the **Connected Kitchen Equipment** solution, BUNN was able to bring connectivity and operational insights to their customers. By connecting its commercial brewing machines, BUNN was able to increase levels of service and decrease the lifetime cost of ownership. Coffee shops, restaurants, and airport lounges can offer consistent, delicious, and heartwarming beverages to their customers.

"A service technician for a quick-service customer got an alert on a Friday night, so he just grabbed the part he needed for the repair and headed into the restaurant at 6 A.M. the next morning. He was able to service the equipment before the customer even noticed a problem. With this solution, we know exactly which component to fix before we get there."

*Kurt Powell, Executive Vice President at BUNN*
