

# Intercompany

Easy, automated and feature-rich intercompany capabilities in Microsoft Dynamics 365 Business Central

The Intercompany app extends the intercompany capabilities of Microsoft Dynamics 365 Business Central to provide you with 3 main benefits:

- ✓ Spend less time
- ✓ Automate more
- ✓ Manage in more details

The Intercompany app utilizes webservice to execute transactions instantly. And it has rich features like inventory look-up across companies, automated drop-shipment, automated management of order changes across companies etc.

## Main features

- Instant execution of transactions
- Inventory look-up across companies
- Automated Drop Shipment
- Automated order changes across companies
- Posting across companies
- Automated posting of Sales Orders
- Automated posting of the Intercompany journal

Yes, the standard Business Central solution has some intercompany functionality out-of-the-box, and for the simple needs the standard functionality may be enough.

The Intercompany app adds many features on top of this. It's all you need when you are getting serious about Intercompany – or if you want to remove manual processes, automate more and work with a more detailed setup.
