

An All-In-One Construction Solution

CEM UniConstruct on Dynamics 365

CEM UniConstruct is a comprehensive solution for the construction industry, built with Microsoft and CEM products. One single integrated system to meet all your needs, comprehensively and economically.

You are assured of cost reduction, timely delivery, satisfied customers, happier employees and more. Your entire team is enabled with mobile proactive system alerts, clear visibility with graphical dashboards, work reminders, greeting messages, pay check data, weather warnings, video / audio / text communications, automated compliance submittals and transmittals. You make a single affordable monthly payment for your usage to Microsoft. Your system is Microsoft Azure cloud enabled, protected and secured.

WHAT WE OFFER

Microsoft Technologies

CEM UniConstruct uses Microsoft technologies, like Azure, Dynamics ERP, CRM, HR, Power Platform, LinkedIn, MS Project, DevOps, Teams, CDS, Azure Synapse Analytics, Customer Insights, AI, ML, IoT and more. The roadmap includes Guide, HoloLens, Robotics & Drones.

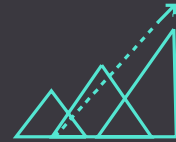

Comprehensive

Processes include estimation, bidding, contracts, surety, scheduling, sub-contracting, supply chain, projects, AIA billing, finance, HR, payroll, prevailing wages, union payroll, concrete, assets utilization, GIS, benefits, compliance, mobile daily log and more.

Compliant

CEM UniConstruct is compliant with federal, state and local tax regulations. It is compliant with union and Davis Bacon Act regulations. This solution is on the Azure environment, it is secured and compliant with other regulations like GDPR, Security, DR / BC etc.

Integrations

CEM UniConstruct can be used on any device, mobile, tablet, laptop or desktop. This system seamlessly integrates with T&A devices, banks, benefit providers, e-Verify, labor unions, prevailing wages reports, IoT devices, compliance portals and many more applications.

WHAT OUR CUSTOMERS ARE SAYING

"We are a very efficient organization. Our 'estimation, costing, planning, and control' team is about half the size of many of our competitors. We want our IT to be implemented in a way that it continuously improve these."

"We had our assets and resources spread all over the project sites. Now, with a clarity on numbers, every project manager is conscious of the cost. Equipment and assets are brought on site, only when needed, instead of being stored on the site indefinitely. We can see better results because of the information visibility."

"In this digital world, keeping up with the advancements in technology is necessary for a company's progress. Microsoft upgrades its products continuously. We want the latest technology to be deployed as soon as possible. Technology gives us the edge and we trust Microsoft and CEM for the same". Duraivel, Project Director, Granite Construction.

Increase your return on investment with Microsoft's agile and efficient cloud solution.

TALENT

Extend your virtual team and coordinate faster with a consolidated view of team members, activities and responsibilities.

MARKETING

Gain end-to-end visibility by connecting data from external markets, social and legacy sources

WHY MICROSOFT DYNAMICS 365

Modern applications that deliver new experiences and connect with a businesses' existing systems to allow organization to digitally transform their way. Applications that use mixed **reality**, the ability to take an application that overlays on the reality in front of the user, that guides them through a business process like never before. Connect to information from social networks, mobile devices and micro-applications to drive intelligence and inform a more effective business process.

Unified data and processes that enables business without silos. Centralized data enables disparate groups to work together effectively with a single, trusted view of processes, relationships and data. Data connectors allow thousands of systems to bring their data to a single network.

Intelligence that delivers actionable insight. Data in the new world includes social, relationship and productivity information in addition to insights generated by business systems. The right solution requires a unified approach that allows companies to automatically leverage their data to decide and act in real-time with expanded analytics, predictive algorithms, and automated AI.

An extensible environment that enables change. The right solution establishes a data, communication and application environment that makes it easy to evolve and extend existing business operations, while introducing technologies that enable users to create solutions where no solution exists and to expand data analysis.
