

ReachMe

Business Card Scanner App

Instant Customer Connect

ABOUT ReachMe:

ReachMe app allows to capture contact information from paper Business Card or QR Code and synchronizes contacts with Dynamics 365. It allows connection over WhatsApp, SMS, Email etc from the App itself with ability to share own contact information with contact directly.

WHAT WE OFFER

QR Contact as virtual card

Reduce the hassle of printing and carrying visiting cards. Extract and share important contact information in Jiffy. Create your own QR Code or scan QR code to transfer contact details.

Enterprise CRM Integration QR Contact as virtual card

Store contact details straight into your Dynamics 365 with seamless accessibility over cloud anywhere/anytime. Current integration available with Dynamics 365 and few other CRM systems.

Initiate communication from app via WhatsApp & SMS

Voice calls can be made from within the app. It identifies your contact details and connects with the on WhatsApp & SMS. You can also add reminders and notes.

WHAT OUR CUSTOMERS ARE SAYING

“ReachMe allowed me to quickly scan the business card at events store contacts directly to Dynamics 365. This just removed the need to carry visiting cards at events and then didn’t had to worry about losing them...”

– Tripti Chopra, Researchbytes

Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.

KEY USE CASES

WEB APPLICATIONS

Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

CLOUD STORAGE

Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

BIG DATA & HPC

Get actionable insights from your data by taking advantage of a fully compatible, enterprise-ready Hadoop service.

MOBILE

Accelerate your mobile app development by using a backend hosted on Microsoft Azure.

MEDIA

Create, manage, and distribute media in the cloud – everything from encoding to content protection

WHY AZURE

FLEXIBLE APPLICATION MODEL

Microsoft Azure provides a rich set of application services, including SDKs, caching, messaging, and identity. You can write applications in .NET, PHP, Java, node.js, Python, Ruby, or using open REST protocols. This is all part of Microsoft's promise to let you build using any language, tool, or framework.

ALWAYS ON, ALWAYS HERE

Build resilient applications with automatic operating system and service updating, built-in network load balancing, and geo-redundant storage. Microsoft Azure also proudly delivers a 99.95% monthly SLA. You can rely on decades of experience in data center operations and trust that everything Microsoft Azure offers is backed by industry certifications for security and compliance.

DATA CENTER WITHOUT BOUNDARIES

Microsoft Azure makes it easy for you to integrate your on-premises IT environment with the public cloud. Migrate your virtual machines to Microsoft Azure without the need to convert them to a different format. Use the robust messaging and networking capabilities in Microsoft Azure to deliver hybrid solutions, and then manage your hybrid applications from a single console with Microsoft System Center.

GLOBAL REACH

With data centers around the globe, a massive investment in data center innovation, and a worldwide Content Delivery Network, you can build applications that provide the best experience for users, wherever they are.
