PATIENT INSIGHTS AND ACTIVITY TRACKER DETAILS

Detailed Information

Track and monitor COVID patients' symptoms and treatments with ease without any change to existing systems. Easily segment patients and ensure the complete end to end tracking of treatments.
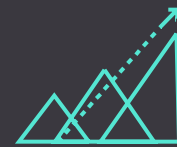

Insight and Intelligence

Quickly and safely connect with existing systems and use the power of Microsoft Azure Customer Insights to understand the patient details and bring out the intelligence based on data. Obtain details on Chance of Recurrence, Possible number of days to recover and other details.

Post Discharge follow up

Keep track of the temperature, symptoms and other activities by sending automatic WhatsApp messages to patients and garner intelligence based on responses. Effective use of public application like WhatsApp to ensure health and safety of the discharged patients

Dashboard

Increase efficiency in treating the patients with immediate access to complete patient information in a dashboard. Have the KPIs and insights in one stop dashboard that will obtain. Complete history of treatment in a easy on the eye and useful decision enabling chart.

Key Benefits :

- 360° patient monitoring and management
- Intelligent prediction and insights on recovery & recurrence
- Scalable and instant deployment with bi-directional informational exchange
- Automated Post discharge patient monitoring via WhatsApp
- Multi-dimensional Data Analysis & insights
