The Challenges With Getting Back To Work

Bringing one person back to the office while they are sick risks a second wave of infection.

Existing telemedicine services require a doctor to be online at the same time.

Screening your workforce is expensive.

Testing everyone is not practical.

A Rapid, Low Cost Way To Get Your Team Back To Work

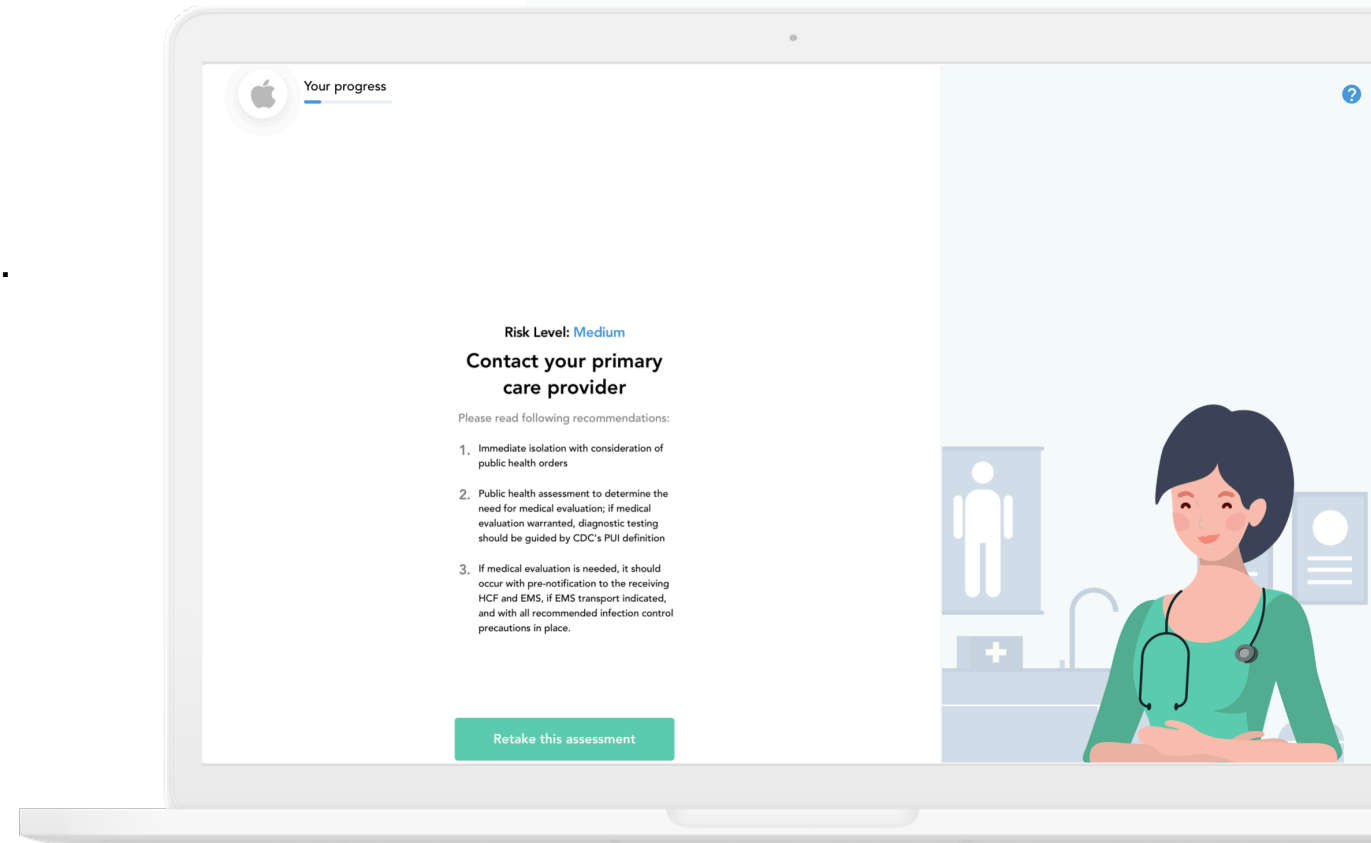

Remotely screen your workforce at any time from any location and any device.

Screen 1,000s of team members at the same time.

Get team member health reports immediately.

Understand which team members are fit to return on site.

Integrate directly into a network of doctors.

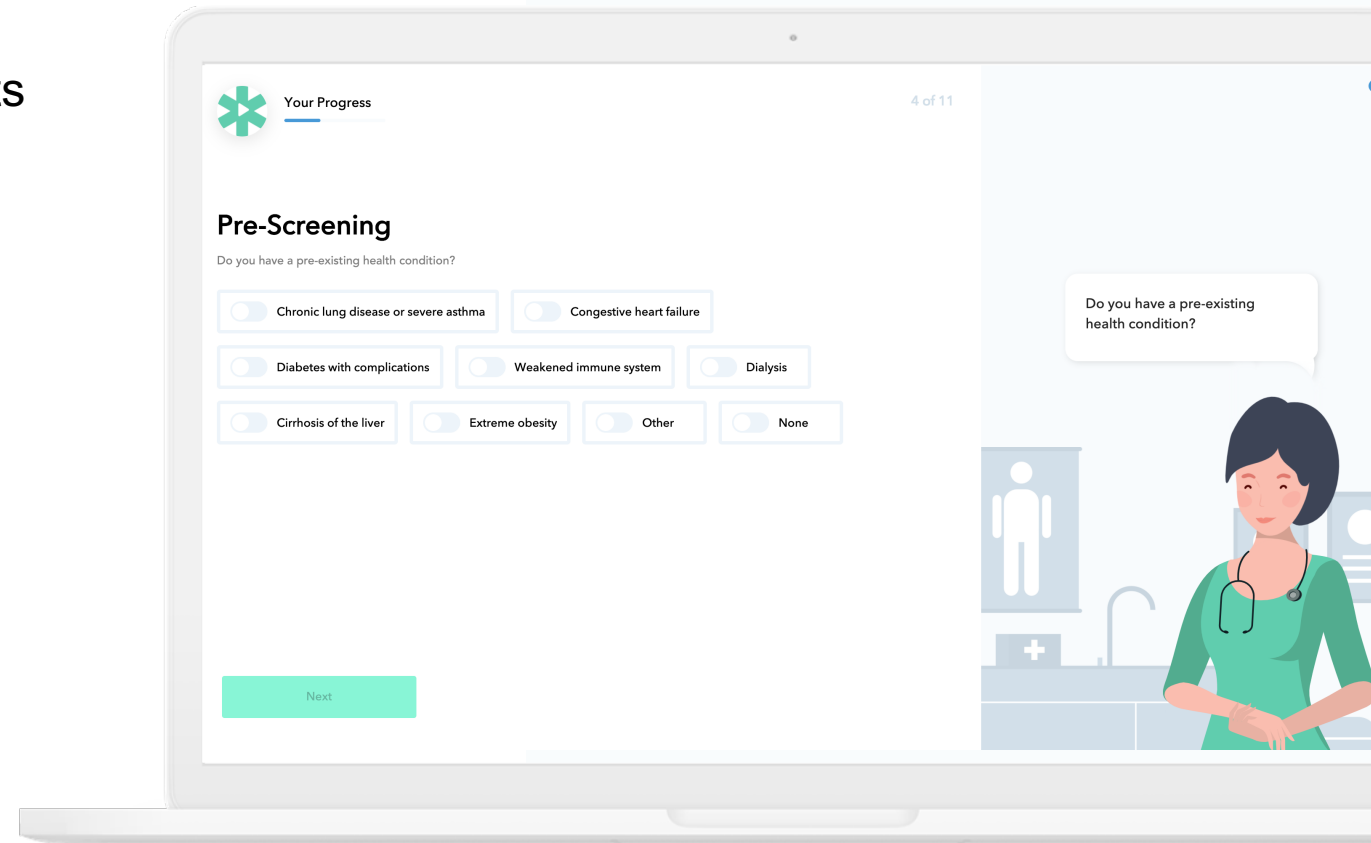

Symptom Checking

Create the symptoms you want to ask your patients about.

Understand team member reported health symptoms.

Available in English, Spanish, French, Arabic, Urdu, Hindi.

Virtual Video Triage Questions

Ask your team members for more information about their problems.

Review your team members virtual triage videos from anywhere and on any device.

Share team member profiles with a doctor for professional review instantly.

Powered by AI

Using cutting edge neural networks to power a user experience which is flexible and immersive

ASR and TTS networks helping to decrease the time to screen patients.

Tried and trusted by doctors.

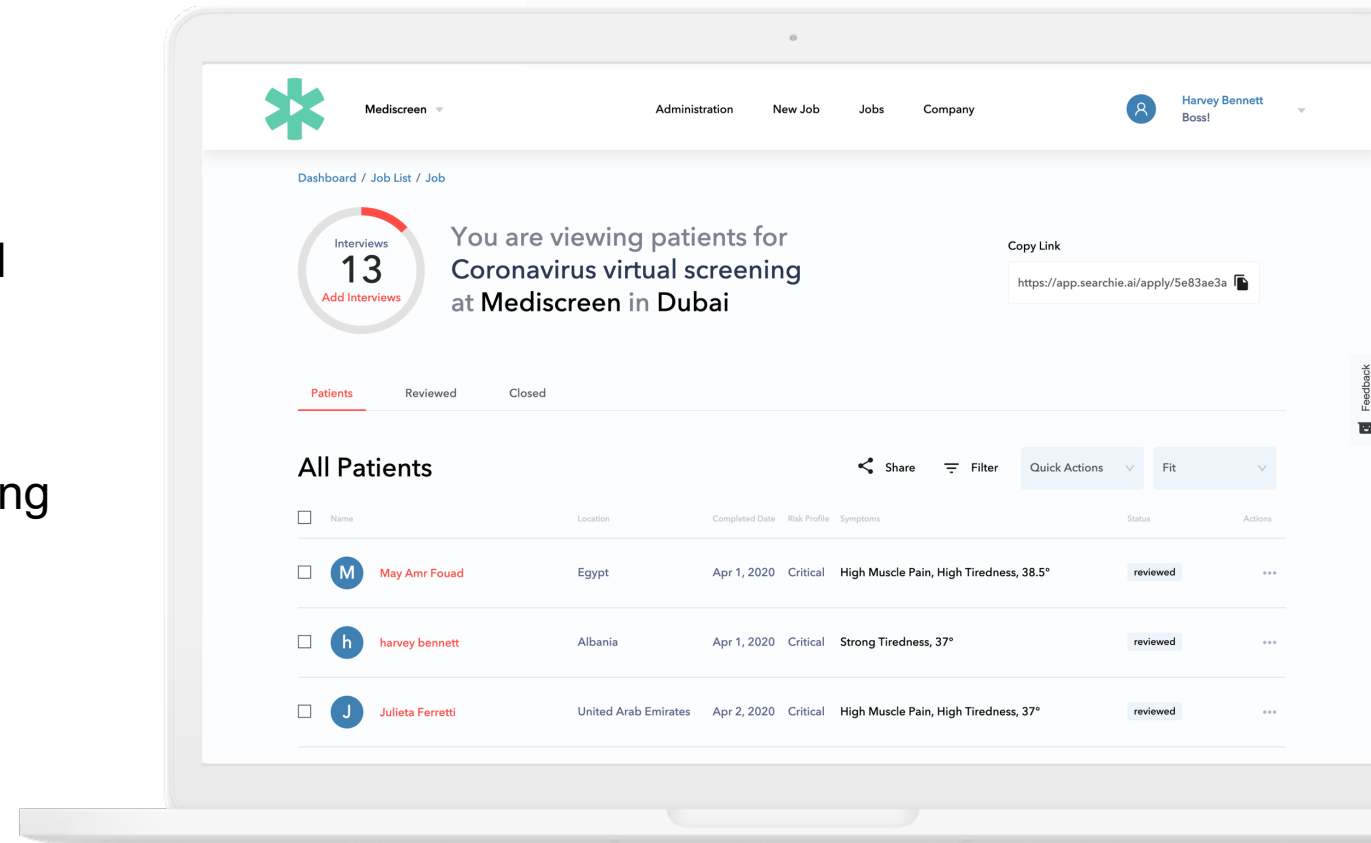

Team Member Fitness

Mediscreen will automatically prioritise team members who share symptoms that are high risk.

Every team member comes with their own medical report which you can use to understand their symptoms better

You can, share, comment on patients, send a testing kit or schedule a call directly inside Searchie.

Insights You Can Act On

Automated team member prioritisation

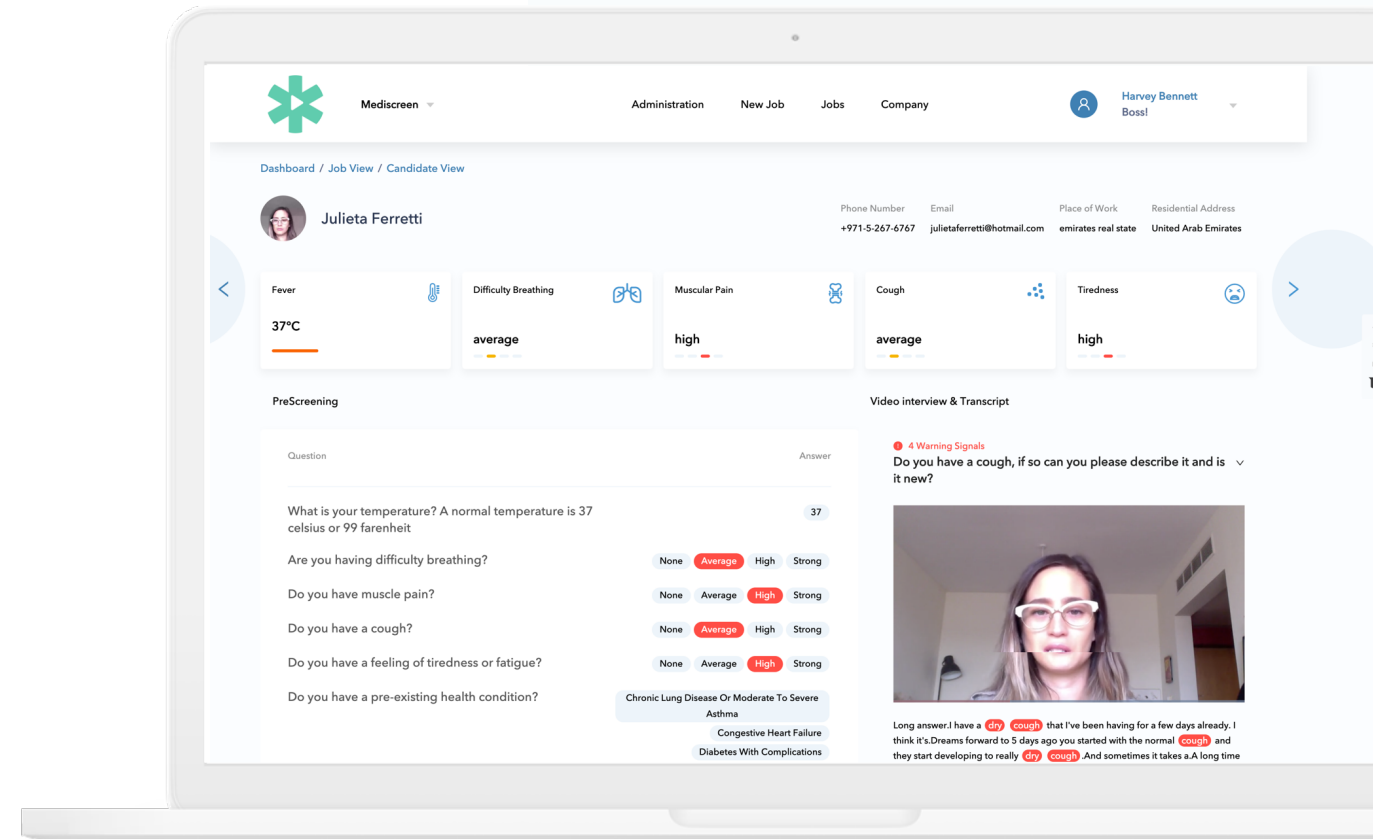

Automatically identify team members at high risk.

Team member profile reports

Review details of the team members symptoms and see their responses.

Select who should stay home

Decide who you bring back on site in minutes.
