FASTTRACK
AZURE VIRTUAL DESKTOP (AVD)
2-Wk DESIGN & IMPLEMENTATION

Working in a hybrid environment is now the norm

Being able to work and access your desktop and applications securely, from any device, from anywhere in the world, is no longer just an option—it's essential and an important step in a company's digital transformation.

For IT teams, this means simplifying desktop implementation and management. Virtualization also provides enhanced security, since it helps to keep your data off end users' devices. With ITI's Azure Virtual Desktop FastTrack, we can help you deploy AVD core services.

AVD advantages

→ Access your desktops from virtually anywhere
→ Provide a simultaneous, multisession virtual desktop experience with Windows 10/11
→ Reduce costs using existing licenses
→ Simplify Windows image management
→ Accelerate your digital transformation and cloud adoption

ITI's approach

For 30 years, ITI has combined the energy and innovation of a start-up with the experience of a firmly established company. With 450 employees who hold a total of 1,400 certifications, ITI provides high-level expertise to serve more than 1,500 clients.

ITI's Azure team is a leader in this practice, with thousands of hours of experience working on hundreds of architecture, implementation, migration and modernization projects. ITI's methodical approach is based on the Microsoft Cloud Adoption Framework for Azure, which enables organizations, both public and private, to plan and execute their migration at a sustainable pace and reap benefits from it in the early stages.

Our deliverables

→ Validation of your Microsoft funding eligibility for professional services
→ Information gathering session
→ Design and implementation of your environment
→ Knowledge transfer and as-built documentation
