

# DIGITAL TRANSFORMATION

## CASE STUDY

- Industry** : Self-Service Retail, Market
- Project** : Application Development
- Technology** : ASP. Net, Web API, SQL Server
- Service** : Azure App Service, Azure SQL, Azure App Insights, Azure Monitor

## AT A GLANCE

### Challenges

- Reinvent office
- Self-service food options
- Convenient payments

### Solutions

- Seamless Data Synchronization
- Health Sustainability
- Content Localization

## OBJECTIVES

A new way to reinvent the office breakroom. Built Self-service food options & convenience at no cost to the organization with convenient ways to pay.

## SOLUTIONS

Used REST API for seamless synchronization of data between multiple operators and customer locations. Sustained the health of various components in the application ecosystem in Azure using Azure App Insights and localized the content for regions.

## BENEFITS

**Enhanced data collection**

**Data-driven Customer Insights**

**Increased Profits**
