MARSEILLE FOS PORT AUTHORITY

TESTIMONIAL

Mr COLONNA - Responsible for Mailinblack at the Marseille Fos Port Authority

"As soon as the solution was implemented, we observed real benefits and massive support from our employees and contacts. Mailinblack offers a simple and intuitive service that, thanks to the authentication of senders, protects us against huge volumes of spam so we can work in complete security. The strength of their solution and its easy integration in our IS, throughout its upgrades, are also features that we appreciate and which mean we don't have to spend time on administering the platform."
