E-Commerce Integration BC

Connect your E-Commerce platform directly to Microsoft Dynamics 365 Business Central via this ISV built by BEG on Microsoft. This ISV is not just for B2B sales but also for B2C sales and is highly scalable and offers in-depth reporting.

With the development of this solution, integration with Magento, Shopify and more are possible.

KEY FEATURES:

Products

Can manage various products with multiple attributes and variants

Inventory

Manages all your incoming and outcoming sales and updates the inventory automatically while reflecting on your ERP solution

Customers

Keeps a database of all your customers and updates the ERP which can be used to send out marketing campaigns if needed

Sales Order

Manages all your customer and vendor sales orders whilst supporting multi-currency

Fulfillment

Updates the system with order status and marks it complete once the order is fulfilled

Price Management

Once the prices are updated, it is auto synced between the E-commerce platform and the ERP

Multi-Currency

Supports various currencies during the entire sales cycle
