The modular quality management for your company

Checklists – Audits – Sensor Technology – Device Monitoring – Training Administration

The tool for the central definition, execution, monitoring, optimization, analysis, and archiving

of operational processes and critical control points – independent

of industry and platform!

All data

from your modules converge centrally at one spot.

Sit back and relax. Thanks to QMSpot, you are always in full control.

Anytime and anywhere

QMSpot is configurable with great flexibility.

We also offer plans with additional modules, features, storage

and support at very reasonable prices:

Management module

This is your essential control center and the heart of QMSpot.

With the MY module, you can manage important information such as location data, contacts, persons to be contacted, administrators, users and your emergency management. As the admin, you have both the integrated document management as well as all the information to all relevant data in full view on your dashboard.

Let's call it managing matters simply and effectively!

Keyfeatures

ALLOCATION OF TASKS

The selective distribution of tasks enables you to assign or terminate tasks to individual users or entire groups.

DOCUMENTS

With the use of the central document management system, company documents can be downloaded, released and distributed throughout the system.

ERROR MANAGEMENT

Using central error registration, you can turn errors into tasks for your employees with just one click or automatically.

CONFIGURATION

Manage your master data: location data, contacts, emergency contacts, administrators and users.

AT HOME EVERYWHERE

QM Spot is multilingual. Just determine the language you need to use, and switch to it.

OFFLINE

Trouble with the connection? Complete your tasks offline with our application. Your data will be synchronized automatically when you are back online.

Discover more of **MY Features**, along with other modules to personalize your **QMSpot**.

Keyfeatures

LIGHT/DARK DESIGN

In your QMSpot, you are the master of light and shadow. Just choose the design you want.

QR-SCAN

Use our internal codes to see device data, measuring points and upcoming tasks without delay.

ACROSS MODULES

The cross-module communication ensures that you can assign tasks. In case of an error in the DM Module, the CS Module automatically assumes the task of creating checklists.

FLEXIBLE

Individual modules can be installed within the system at any time, the same way that outdated modules can be removed.

CENTRAL

All data from your modules converge centrally at one spot.

TRY IT OUT

Start a **30-day non-binding trial** to discover many more features of MY module free of charge.

There were times when you, too, lost control?

With **QMSpot's MY Module**, you'll always have a digital overview.

Free trial for 30 days

Checklist System

So you're a control freak and a pragmatist? Well then, the CS Module is just what you need. It enables you to digitally map all operational checklists, whether they're simple cleaning lists or complex products-acceptance lists with validation of the recorded data. All completed checklists are automatically archived as reports. They are always at your disposal for evaluation, data comparison or official inspection. Everything in view at the push of a button.

Keyfeatures

CONFIGURATION

Speedily create complex checklists that include logic and validation.

TASKS

Distribute specific tasks to individual employees or entire groups.

DEADLINES

Determine when to do what. Recurring tasks are created automatically.

INSTRUCTIONS

Leave your employees instructions and procedural notes.

CCPs

Define Critical Check Points and receive error alerts right away.

ALERTS

Receive alerts and reminders for delays, limit deviations or errors.

Discover more of CS Features, along with other modules to personalize your **QMSpot**.

Keyfeatures

CRISIS MANAGEMENT

From accumulated alerts and
error notices, create a
new task at the push of a button.

PROOF OF COMPLETION

Ask for photo evidence to monitor proper
completion of tasks.

REPORTS

Receive manually or automatically generated
daily, weekly, monthly or quarterly reports.

EXPORT

Freely export data as PDF to then print or send
by e-mail.

INTERIM STORAGE

Interrupt your work at any time and reopen
it at will.

OFFLINE

No internet connection? Just keep working
offline. The data will later be automatically
synchronized.

CLOSING DAYS

Remove closing days from the system at any
time, even afterwards. That way, no idle data
remain in the system.

CHECK IT OUT

Start a **30-day non-binding trial** to discover
many more features of CS module free of
charge.

So fresh! So clean?

With the QMSpot's **CS Module**, you too can become a Checker.

Training Administration

The TA module enables you to keep an eye on your own training status and that of your employees.

Create and manage all legally required hygiene and staff training.

Generate notifications in no time at all. Create study material and attendance lists at the push of a button.

Keyfeatures

CONFIGURATION

Create hygiene and staff training within minutes.

MANAGEMENT

Schedule one-time and recurring courses and invite your employees to them.

PREPARATION

Compile the training material for all employees in one bundle.

OVERVIEW

See the training status of your employees and course locations at a glance.

ABIDE BY THE LAW

Maintain compliance and proof of all mandatory training courses prescribed by law.

DOCUMENTATION

All data regarding training and the status of courses are automatically documented.

Discover more of **TA Features**, along with other modules to personalize your **QMSpot**.

Keyfeatures

EVALUATION

Use your data for extensive evaluations and analyses.

REMINDERS

Receive automatic reminders about training backlogs and scheduled trainings.

REPORTS

Receive manually or automatically generated daily, weekly, monthly or quarterly reports.

EXPORT

Freely export data as PDF to then print or send by e-mail.

CERTIFICATES

Send certificates of participation to your employees directly by e-mail or in print.

ONLINE

Give online training to your employees and immediately check their results in the test center.

CHECK IT OUT

Start a **30-day non-binding trial** to discover many more features of TA module free of charge.

You think training like a professional is tough?

Taking courses with QMSpot's **TA Module** is child's play.

Device Monitoring

Thanks to QMSpot's device monitoring, all data of the devices in your company are permanently recorded and documented. When there is an emergency, you are informed immediately and can act without losing time. With our DM module, you can monitor your devices seamlessly, while always maintaining full control. Is any maintenance, repair or other servicing work pending?
No problem! - thanks to the QMSpot DM module.

Keyfeatures

TROUBLESHOOTING

Record and document all incidents connected to your devices in use

MAINTENANCE

Schedule maintenance or service work and receive reminders of due dates.

DOWNTIME

Reduce your response and downtime periods by immediately notifying external service technicians about acute malfunctions or maintenance schedules.

REDUCE COSTS

Through continuous monitoring and regular maintenance of your equipment, you will permanently reduce the costs for repairs and breakdowns.

COST OVERVIEW

With the DM module, you always have an overview of the costs for repairs, maintenance & servicing.

WARRANTY PERIODS

Keep track of all expiration dates and the terms of your warranty periods.

Discover more of **DM Features**, along with other modules to personalize your **QMSpot**.

Keyfeatures

OPERATING TIME

Record and document the operating periods of your devices at different locations.

DOCUMENTS

Make it easy for yourself and your employees by providing the right operating instructions and manuals at the push of a button.

API INTERFACE

Connect your devices with our API interface to automatically fetch all available data directly from the manufacturer

WORKFLOW

Simply link your devices to maintenance lists in the CS module and control the recording and defects or errors centrally from one point.

CHECK IT OUT

Start a **30-day non-binding trial** to discover many more features of DM module free of charge.

So you want to react faster?

No problem! With the **DM Module** from **QMSpot**, it's all in your hands.

Sensor Technology

Monitoring and automatic documentation of all critical sensor data thanks to the QMSpot Sensorik ST module. With the QMSpot sensor module you record a wide variety of sensor data and measuring points from various manufacturers in your company. **Regardless of whether temperatures, fill levels, humidity, CO2 values of rooms, refrigerators, cold stores, dishwashers, counters or other IoT devices, everything is open to you with our ST module.**

Keyfeatures

SECURITY

Use the sensors to effectively protect yourself against the rotting of expensive foods while you keep an eye on all critical temperatures.

INDEPENDENT

Our API interface integration enables data transfer from the most varied device manufacturers.

AUTOMATIC

Permanent and automatic monitoring of your critical temperature data with G5 IoT Sensors, W-Lan Sensors and/or Bluetooth beacons.

MANUAL

Control with precision all measuring points or process measurements, using an infrared and probe thermometer.

CONFIGURATION

For each measuring point you simply set the various parameters: tolerance and limit values, time of measurement, activity period etc.

ALERTS

Receive alerts and reminders for delays, value deviations or errors.

Discover more of **ST Features**, along with other modules to personalize your **QMSpot**.

Keyfeatures

DOCUMENTATION

All your measurement data are automatically documented and archived, ready for you to conduct controls or evaluations.

RETROFITTING

You can also retrofit your old devices with our WiFi sensors, IoT sensors and beacons. We would be happy to supply you with the right hardware.

EXPAND

You can expand your ST module at any time with additional sensors, beacons, measuring points or other devices.

ACCURACY

The sensors we recommended offer class IP67 protection, a measuring range of -40°C ...+70°Cor-200°C...+200°C, at a measuring accuracy of up to ±0.10°C, max.±0.15°C.

CERTIFICATION

On request we conduct a traceable 3-point temperature calibration and issue an individual calibration certificate for our sensors.

TRY IT OUT

Start a **30-day non-binding trial** to discover many more features of ST module free of charge.

You like getting to the point right away?

The **ST Module** of QMSpot always puts you one step ahead.

Audit System

With the QMSpot audit system, you will simplify and standardize all the processes in your company, before, during and after an audit.

All open points and deficiencies found during the audit are directly transferred by our intelligent linking as tasks to the QMSpot CS module.

Our AS-module serves you as a multi-functional tool for statistics, reports and evaluations.

Keyfeatures

CONFIGURATION
Create audits with various auditing criteria and weightings.

TEMPLATES
Use self-made templates for consistent audits, risk assessments, hazard analyses or inspections.

DATA TRANSFER
Conduct follow-up audits and compare your entries with the data from the last audit.

CCPs
Define Critical Check Points and receive alerts right away in case of deviations.

CRISIS MANAGEMENT
From accumulated warnings and defects, create a new task at the push of a button.

ANALYSES
Create industry-independent risk analyses, hazard assessments, safety audits, inspections and much more.

Discover more of AS Features, along with other modules to personalize your QMSpot.

Keyfeatures

INSTRUCTIONS

Leave work instructions and procedural instructions for your employees.

DEADLINES

Define what should be done and when. Recurring tasks are automatically created.

REPORTS

Receive manual or automated daily, weekly, monthly or quarterly reports.

EXPORT

Export your data at any time as a PDF file, so you can print it or send it by mail.

INTERIM STORAGE

Interrupt your work at any time and take it up it again later.

OFFLINE

If the connection is lost, simply continue working offline. The data will be synchronized automatically.

SAVE TIME

Don't waste any more time -- reduce post-processing efforts to zero.

CHECK IT OUT

Start a **30-day non-binding trial** to discover many more features of AS module free of charge.

From visionary to analyst!

With the AS module from **QMSpot**, you too can become a data expert.
