PLANNING
SERVICES

SharePoint feature sets which are typical content management planning discussions cover the usage, differentiation and planning of:

List, Library & Metadata Features

- Structuring content with Document Sets
- Termstore (Term Sets)
- Content Filtering, sorting, and rollup
- Content Types and relationships
- Libraries and custom columns
- Content Versioning Control and Retention Policies

Communication Site vs. Team Sites

- Web Part utilization
- Site Templates, List
- Page layouts

Navigational Planning and Components (Global, Local and hub)
