ABOUT TEAMSPRO

WHAT IS TEAMSPRO?

TeamsPro is a suite of Microsoft Teams apps that add more functionalities to Teams. Each app has a specific purpose and/or use case.

Built on Microsoft Azure, TeamsPro seamlessly integrates and leverages Microsoft Teams — and best of all, it's a plug-and-play solution: users won't see a line of code.

WHAT CLIENTS SAY ABOUT TEAMSPRO APPS

“We are able to replicate a constantly changing operational whiteboard in our office. This gives our remote working team a sense of the operational activity that has happened and what is scheduled coming up. Having the option for others to edit and move activities around is very useful and promotes the collaborative way we work.”

Debbie Pepler
Head of Operations of Talick Group, UK
