

Your trusted Azure partner

Azure Advantage Assessment

Discovery and Collection

- Scan full infrastructure, full application portfolio, and underlying DBs
- Coverage includes Win Server/SQL Server and Linux/OSS DB, standalone web applications, .NET, Java, PHP, JavaScript, and application access/ownership

Comprehensive Analysis

- Categorize all servers by workload type
- Prioritize workloads and applications as candidates for Azure migration

Deliverables

- Readiness report with Exec Summary
- Business case with TCO analysis
- Security/governance recommendations
- Recommendations on next steps
