

EMS ENERGIZE

Enterprise Mobility & Security Suite
Quick Start — Proof of Concept

EMPOWER YOUR ENTERPRISE MOBILITY AND PROTECT YOUR INTELLECTUAL PROPERTY FOR UP TO 25 USERS

Challenges EMS Addresses:

- ✓ Users expect to be productive across a variety of device types, with access to the applications they use every day
- ✓ Businesses need to unify their infrastructure technology environment with a common identity
- ✓ Businesses must protect their data

Identity Management

On-Premises & SaaS Apps

- Self-Service password reset
- Single sign-on to cloud apps
- Multi-factor authentication
- Machine learning security reporting

Enterprise Security

Prevent Data Loss

- Encrypt documents and restrict usage
- Share sensitive documents securely
- Monitor network usage to find intruders, stolen credentials, and bad employee behavior

Mobile Device & Application Management

Control Mobile Devices & Apps

- Patch applications regardless of device platform
- Deploy software & use Autopilot for device configuration
- Selectively wipe devices at the document level
- Connector to popular SCCM tools with Endpoint Manager

Azure Active Directory Premium P1 - Microsoft Endpoint Manager - Azure Information Protection P1
