Managed SOC and SIEM Powered by Microsoft Sentinel and Logicalis

Save Money and enhance your security posture.

Deploy faster, reduce setup training costs, and increase efficiency.

Make security a fundamental part of your digital transformation.

In the modern marketplace businesses must adapt to opportunities in real-time. This requires a digital operating model that provides unprecedented agility and flexibility whilst simultaneously meeting the highest standards of customer security and data integrity.

That is why Logicalis SA designed our Managed SOC as a Service Solution. It weaves real-time security telemetry and response into every element of your digital fabric, providing you with the confidence to focus on what matters most to your business – driving greater agility, innovation, and growth.

Logicalis Managed Security Operations Centre value proposition.

The Logicalis SA Managed SOC integrates and orchestrates security across our customer's entire digital ecosystem using a hyper-scale Microsoft Sentinel cloud-native platform to provide automated intelligent insights that can be analysed and actioned in real-time.

The Logicalis SA SOC as a Service offers customers external, highly qualified cybersecurity experts who monitor customer cloud environments, devices, logs and networks for threats. The solution is a subscription model where the customer pays a monthly or yearly fee to ensure that threats are being detected and responded to accordingly.

Azure Sentinel ingests data from a variety of security products, protecting the investment customers have made in their security infrastructure. The highly certified engineers and advisory consultants at Logicalis have deep knowledge of security solutions and best practices, as well as significant cloud and networking expertise.

LOGICALIS
Architects of Change
MEMBER OF THE **DATATEC** GROUP

Turn cybersecurity into a business enabler

Secure IoT
Drive innovation through IoT solutions with a secure and trusted network.
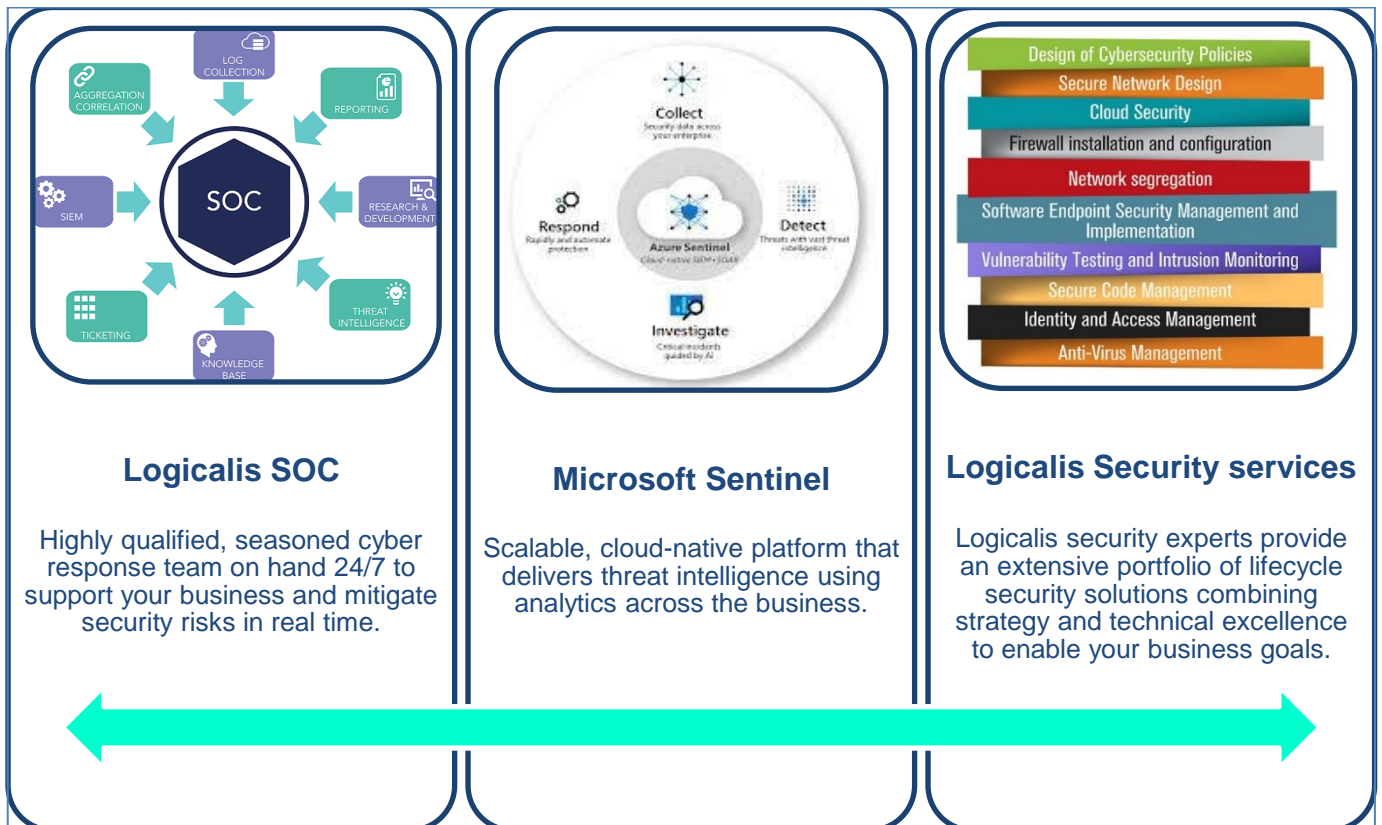

Productive workplace
Support employee productivity through more secure and flexible remote working.

Data insights
Use insights to make better security decisions and decide on the best course of action.

Cloud
Embark upon your cloud journey with confidence and deliver agile solutions.

Logicalis SOC

Highly qualified, seasoned cyber response team on hand 24/7 to support your business and mitigate security risks in real time.

Microsoft Sentinel

Scalable, cloud-native platform that delivers threat intelligence using analytics across the business.

Logicalis Security services

Logicalis security experts provide an extensive portfolio of lifecycle security solutions combining strategy and technical excellence to enable your business goals.

Gain deeper insights with greater efficiency

See and act on security threats at speed, so you can focus on higher-level, value-adding tasks.

Secure IoT
Drive innovation through IoT solutions with a secure and trusted network.

Improved service availability
Leverage advanced threat hunting capabilities to predict incidents before they occur.

Faster incident resolution
Deal with threats faster using automation.

Employee empowerment
Allow staff to focus on higher-level tasks.

How we get you there

We help you get things right the first time, so you can realize value in a short timeframe, and then support you along the journey to ensure continuous improvement.

Phase 1 **Align**

Phase 2 **Transform**

Phase 3 **Scale**

Align
Managed SOC Assessment
Business Service scoping and operational cost estimate for Microsoft Sentinel deployment to your digital fabric.

Transform
Proof of Value
Microsoft Sentinel guided proof of value focusing on critical business services

Scale
Managed SOC
Managed SOC powered by Microsoft Sentinel enables continuous improvement with managed and monitoring services.

Make security a fundamental part of your digital transformation.

Contact us to start benefiting from a solution that transforms cybersecurity into a business enabler that supportsdigital transformation and business growth.
