**LAKEFOREST**
C O N S U L T I N G

**We help companies to be proactive and have a better overview and control over their own information systems and services.**

## HOW DO WE WORK?

We create a 360 degree view of the customer's IT infrastructure. This enables us to identify and respond to various attacks in a timely manner.

## WHAT DO WE OFFER?

A safer working environment

More efficient use of workforce

Reduced risks

## Our Services

We have put together various Microsoft cloud-based information security and management solutions. See more at: **https://lakeforestconsulting.com/services/**

| Simple, easy to manage | Manage any cloud services | Security is part of the management process |
| --- | --- | --- |

*Lakeforest is proactive. We work every day to improve the IT security of our customers. We don't wait for something to happen, we act proactively.*

*Very efficient, productive, down-to-earth and agile, great management of expectations.*

*Customer from health care*

**Lakeforest Consulting** is an IT company that specializes in modern workplace and data center management. One of the company's co-founders is **Kaido Järvemets**, who was awarded the title of **Microsoft's Most Valuable Professional (MVP)** in 2011.
