

Business Transformation Services from Flintech

How the most successful projects get started

Flintech provides a series of Business Transformation Services to ensure the success of your Dynamics 365 Implementation or Upgrade. Our consultants are highly experienced former executives and business leaders. We start by helping you define "What success looks like" for your organization. Then through a series of 'deep-dive' workshops we'll show you how to get there.

Scoping > Budgetary Estimates > Detailed Project Assessment > Project Proposal and Plan

We get to know your business

What does success look like

Leverage your investment

Business process focused

Path to continuous improvement

We get to know your business

Business Transformation

Why are you considering this important investment? To get a solution like the one you have today, or to remove constraints and become an efficient and continuously improving business?

Project Scoping Workshop

- 1-2 days of workshops to allow Flintech to help you understand the investment required, at a high level
- We'll prepare a budgetary estimate

Experience

Our workshops are led by highly experienced former business leaders

Detailed Project Assessment

- 1-2 weeks of deep-dive workshops and demonstrations aimed at solidifying your transformational vision, goals and objectives
- Produces a high-confidence estimate and timeline

Process Focus

Our workshops are led by highly experienced former business leaders

Business Transformation Workshops

- The first step in exceptional execution
- Executive alignment of vision for project
- Process modeling workshops to define the most effective processes for your business, enabled for continuous improvement
- A defined process catalog and requirements with fit/gap

Process Success

Our workshops are led by highly experienced former business leaders
