Your data engineering partner

Who we are

With more than 700 realized applications, Appsfactory is Germany's leading specialist agency for customer-centric digital transformation. Since 2018, we run a dedicated Data and AI team.

What we offer

Get access to Appsfactory's know-how and resources in data engineering. Our service bundle includes preparation, implementation, and testing of your data engineering tasks. We work using agile methodology, in regular exchange with the client.

What will you get

- Initial clarification between our AI lead and the client team, especially regarding working mode, tooling and coding guidelines
- Mutual review and evaluation of tasks by Appsfactory's data engineer(s)
- Expert feedback and implementation consultancy in all agile meetings
- Working results, comprised of code, documentation and testing
- Upon request: Next steps for your case

What we need from you

- Dedicated contact(s) for our data engineer(s)

Our Approach

We take advantage of Microsoft Azure Cognitive Services, Power Platform and custom Microsoft ML Studio solutions. By leveraging our experience, we guarantee a perfect match between your use cases and our implementation.
